Ruth, ii. Information; power of knowing. *Sidney*.

Scarcely any word has occasioned more altercation among verbal critics than this. A great appearance of propriety seems to favour the second pronunciation, till we observe a great number of similar words, where the long vowel in the simple is shortened in the compound, and then we perceive something like an idiom of pronunciation, which, to correct, would, in some measure, obstruct the current of the language. To preserve the simple without alteration in the compound, is certainly a desirable thing in language; but when the general tune of the language, as it may be called, crosses this analogy, we may depend on the rectitude of general custom, and ought to acquiesce in it. That the secondary accent shortens the vowel, which was long in the original, appears throughout the language in *proclamation, provocation*, &c., 530. That the primary accent does the same in *preface, prelate, prelude*, &c., is evident; and as *ledge* is no general termination of our own, which is applicable to several words, why should we not consider *knowledge* as a simple, and pronounce it independently on its original quantity? The patrons for the first pronunciation are, Mr. Sheridan, Dr. Kenrick, Mr. Nares, Mr. Barelay, Mr. Elphinstone, and Mr. Scott; and for the second, W. Johnston, and Mr. Buchanan. Mr. Perry gives both, but seems to al-

low the first the preference.—See *Principles*, No. 328, 515. *W.*

This word is sometimes pronounced with the vowel in the first syllable short, as if written *lèd-jènd*. This has the feeble plea of the Latin word *lego* to produce; but with what propriety can we make this plea for a short vowel, in English, when we pronounce that very vowel long in the Latin word we derive it from? The genuine and ancient analogy of our language, as Dr. Wallis observes, is, when a word of two syllables has the accent on the first, and the vowel is followed by a single consonant, to pronounce the vowel long. It is thus we pronounce all Latin words of this kind; and in this manner we should certainly have pronounced all our English words, if an affectation of following Latin quantity had not disturbed the natural progress of pronunciation.—See *DRAMA*. But, besides this analogy, the word in question has the authority of Mr. Sheridan, Mr. Scott, W. Johnston, Bailey, Entick, Perry, and Buchanan, on its side. Dr. Kenrick and Dr. Ash are the only abettors of the short sound. *W*.

LE/GEN'DARY*, lèd'-jèn-dâ-rè. *a.* Fabulous; romantic; partaking of the nature of a legend. *Bp. Lloyd*.

As the preceding word has, by the clearest analogy, the vowel in the first syllable long, so this word, by having the accent higher than the antepenultimate, has as clear an analogy for having the same vowel short. 530, 535. This analogy, however, is contradicted by Dr. Ash, W. Johnston, Mr. Scott, Entick, Buchanan, and Perry, who make the vowel *e* long, as in *legend*. As Dr. Johnson's accentuation does not determine the quantity of the vowel, his not inserting this word is, in this case, no loss; but Mr. Sheridan's omission of it deprives us of a valuable opinion. *W*.

LE/GISLATURE, lèd'-jîs-lâ-tshûre. 461. [lèdzh'-îs-lâ-tshûr, *Sheridan*; lèj'-îs-lâ-tur, *Perry*; lèd'-jîs-lâ-tûre, *Jones*.] *n. s.* The power that makes laws. *Hale*.

Some respectable speakers in the House of Commons pronounce the *e* in the first syllable of this word long, as if written *legislature*, and think they are wonderfully correct in doing so, because the first syllable of all Latin words, compounded of *lex*, is long. They do not know, that, in pronouncing the word in this manner, they are contradicting one of the clearest analogies of the language, which is, that the antepenultimate, and secondary accent, shorten every vowel they fall upon, except *u*, unless they are followed by a diphthong. 534, 535. This analogy is evident in a numerous catalogue of words ending in *ity*, where the antepenultimate vowel is short in English, though long in the Latin words whence they are derived: as, *serenity*, *divinity*, *globoſity*, &c. The same may be observed of the words *declamatory*, *deliberative*, &c., where the two second syllables are short in English, though long in the Latin *declamatorius*, *deliberativus*, &c. Even the words *liberal* and *liberty*, if pronounced with the first syllables long, as in the Latin words *liberalis* and *libertas*, ought to be sounded *lybèral* and *lybèrty*. If, therefore, we consider the accent on this first syllable of *legislator*, *legislature*, or *legislative*, either as primary or secondary, we find a clear analogy for shortening the vowel: nor can we have the least reason for lengthening it which will not oblige us, in the same manner, to lengthen the first vowel of *lenitive*, *pedagogue*, *pacification*, and a thousand others.—See *PRINCIPLES*, No. 530, 535. Mr. Sheridan, Dr. Kenrick, Mr. Scott, and Mr. Perry, mark the *e* in the first syllable of this word and its relatives short. W. Johnston, only, marks them long. From Entick we can gather the quantity of this vowel in no word but *legislate*, where he makes it long; and Ash, Bailey, and Buchanan, do not mark it either way. These authorities sufficiently show us the general current of custom; and the analogies of the language sufficiently show the propriety of it. *W*.

LEST, lêst, or lêest. [lêst, *Perry* and *Jones*: lêst, or lêest, *Sheridan.*] *conj.* [from the adjective *least*.] This particle may be sometimes resolved into *that not*, meaning prevention or care lest a thing should happen. *Deut. xxv.* It sometimes means only *that*. *Milton.*

Almost all our orthoëpists pronounce this word both ways; but the former seems to be by much the most general. This word is derived from the adjective *least*: but it is not uncommon for words to change their form when they change their class. Dr. Wallis's advice to spell the superlative of *little* *leastest*, has not yet been followed, and probably never will; and therefore there is no necessity for Dr. Lowth's expedient to distinguish these words by spelling the conjunction with a. But why we should sound the *e* long, contrary to the analogy of spelling, while such a pronunciation confounds

the conjunction and the adjective, cannot be conceived. The second pronunciation, therefore, ought to be exploded. *W.*

make us lose all hope that it will in time be the actual
pronunciation. W.

3 Mr. Sheridan, Mr. Scott, Mr. Buchanan, W. Johnston, and Mr. Barclay, [and Mr. Jones,] pronounce this word in the last manner; but Dr. Johnson, Dr. Kenrick, Mr. Nares, and Mr. Perry, in the first; and that this is the

true pronunciation there is little doubt; not only as it is the more general sound of the diphthong, 323, but as it is more expressive of the thing signified. The other sound is, in my opinion, a novelty, and ought to be exploded. Without laying much stress on Dryden's rhyme, it seems to confirm this opinion:

"Fair Iô grac'd his shield; but Iô now
"With horns exalted stands, and seems to low." *W.*

☞ Whether this word comes from the Dutch *loeren*, to look askance, or from the English word *lower*, signifying to look low, as the sky seems to do when it is heavy and thick with clouds, (which is the much more probable derivation,) it certainly cries aloud for a different spelling from *lower*, to make low. MALEADMINISTRATION, mâle-âd-mîn-nîs trâ-shûn. [mâl-âd-mîn-nîs-trâ-shûn, *Sheridan* and *Perry.*] *n. s.* Bad management of affairs. *Swift.*

♫ I have given the first syllable of this and the succeeding words, compounded of male, the long sound of a, because I look upon male as a prefix not alterable in its sound in words of our own composition, any more than arch, fore, mis, pre, or vice: arch and fore are used separately as adjectives, which is not the case with male; but mis, pre, and vice, are never used out of composition, and are therefore exactly under the same predicament. Dis, not being a prefix of our own which we can apply to words at pleasure, alters the sound of s according to the presence or absence of the accent, or the nature of the succeeding consonants (see Dis); but mis, being applicable to any words, never alters the sound of s. 426. Pre, when prefixed to words of our own, as pre-conceived, pre-supposed, &c., never shortens the vowel, 530, 531, 532; and vice, in vice-president, vice-admiral, &c. might as well be changed into vis-president, and vis-admiral, as male-content and male-practice into malcontent and malpractice. But, though all our pronouncing dictionaries adopt the short sound of a, and some even leave out the e, yet, as analogy is so decidedly in favour of the long sound, and custom is not quite unanimous, the long sound ought certainly to have the preference with all who aim at correctness and consistency. W. Johnston is the only one who adopts this pronunciation; and Barclay, by putting a hyphen after male, seems to favour it. If custom has decided in favour of the short sound of a, the e ought to be omitted in writing, and then the spelling and sound would not be at variance; but, as this would lead to incurable evils in language, the pronunciation ought rather to conform to the orthography. W.

MALL §, mál. [máll, *Perry and Jones.*] *n. s.* [*mal-leus*, Lat.] A kind of beater or hammer. *Addison.* A stroke; a blow. *Spenser.* A walk where they formerly played with malls and balls. *Pope.* [mál, *Perry.*]

☞ This word is a whimsical instance of the caprice of custom. Nothing can be more uniform than the sound we give to *a*, before double *l*, in the same syllable: and yet this word, when it signifies a wooden hammer, has not only changed its deep sound of *a* in *all* into the *a* in *alley*, but has dwindled into the short sound of *e* in *máll*, a walk in St. James's Park, where they formerly played with malls and balls, and from whence it had its name; and, to crown the absurdity, a street parallel to this walk is spelt *Páll Mall*, and pronounced *pell-mell*, which confounds its origin with the French adverb, *pêle mêle*. For Bailey appears to derive the name of

the street justly from *pellere malleo*, to strike with a mallet. That this word was justly pronounced formerly, we can scarcely doubt from the rhymes to it:

"—— With mighty mall

"The monster merciless him made to fall."

Spenser.

"And give that reverend head a mall

"Or two, or three, against a wall." *Hudibras*

As a corroboration of this, we find a large wooden club used for killing swine, called and spelt a *mall*; and the verb signifying to beat or bruise is spelt and pronounced in the same manner. The word *mallet*, where the latter *l* is separated from the former, is under a different predicament, and is pronounced regularly.—See *Principles*, No. 85. *W.*

§ This word is sometimes improperly pronounced with the accent on the first syllable, and is even marked so by Dr. Ash. Milton, with his usual license, sometimes places the accent in this manner:

“ — where he might likeliest find
“ The only two of mankind, but in them
“ The whole included race, his purpos'd prey.”

But Pope, in this particular, is a better guide, both in prose and verse:

“ The proper study of mankind is man.”

Essay on Man.

It may be asked, indeed, why *mankind* should not have the accent on the first syllable as well as *womankind*. It may be answered, so it has, when it is to distinguish it from *womankind*; but when it is used absolutely it includes *womankind*; and, to avoid the distinction which an accent on the first syllable would imply, it very properly throws the accent on the general and not on the specific part of the word. *W.*

§ Dr. Johnson says, this word was probably corrupted from the French *manteau*: and Mr. Elphinston, in his zeal for an homophonous orthography, as it may be called, says, "Manteau, not mantua, having given title to the silk, the maker of mantoes, or mantoes, will have the honour of leading the fashions at the court of truth, when, under so glorious patronage, she announces herself a *mantoemaker*, or *mantoemaker*. "Paduasoy is a similar falsification of *podeseoy*, the English offspring of the French *poudésote*. The Italian cities are much obliged to affectation, for having so long complimented them at her own expense. "Guided by etymology, she had no business with the sound; and a stranger to analogy was not likely to know, that a *mantle*, *mantoe*, or *cloke*, was probably the first silken task of the English *mantoemaker*." *W*.

♂ The *a* in the first syllable of this word is, by Mr. Sheridan and Mr. Buchanan, pronounced long and slender, as in the proper name *Mary*; and this is supposed to be the true sound, as it is imagined the flower was dedicated to the Blessed Virgin: but Mr. Scott, Mr. Perry, and W. Johnston, give the *a* the short sound, as in *marry*; and in this they appear not only more agreeable to general usage, but to that prevailing tendency of shortening the antepenultimate vowel, which runs through the language. 503, 535. Losing the simple in the compound can be no objection, when we reflect on the frequency of this coalition. 515. Nor is it unworthy of observation, that *gold*, in this word, preserves its true sound, and is not corrupted into *gold*. *W.*

MATRONAL, mâ'-rô-nâl, or mâ'-trûn-âl. *a.* [Fr.] Suitable to a matron; constituting a matron. *Bacon.*

☞ I have excluded Mr. Sheridan's pronunciation, which makes the two first syllables of this word exactly like *matron*, because the word is a primitive in our language, derived from the Latin *matronalis*, and, therefore, according to English analogy, when reduced to three syllables, ought to have the accent on the antepenultimate, (see **ACADEMY**); and this accent has, in simple, always a shortening power. 503, 535. The second pronunciation, though not so strictly agreeable to analogy as the first, is still preferable to Mr. Sheridan's. *Matronish* and *matronly* ought to have the first vowel and the accent as in *matron*, because they are compounds of our own; but we do not subjoin *al* to words, as we do *ish* and *ly*, and therefore words of that termination are under a different predicament. Something like this seems to have struck Mr. Sheridan and Dr. Johnson when they accented the word *patronal*: for though this word is exactly of the same form, and is perfectly similar in the quantity of the Latin vowels, we find *matronal* marked with the accent upon the first syllable, and *patronal* on the second. From Dr. Johnson's accentuation we cannot collect the quantity of the vowel; his authority, therefore, in the word in question, is only for the accent on the first syllable. To him may be added, Mr. Scott, Mr. Perry, and Entick, who accent and sound the *a* as Mr. Sheridan has done. Dr. Ash, alone, seems to favour the pronunciation I have given. *W.*

 ¶ There is a diversity in the pronunciation of this word, which makes it necessary to recur to principles to decide which is best. Dr. Johnson, Mr. Sheridan, Mr. Nares, and Mr. Barclay, accent it on the first syllable; and Dr. Ash, Dr. Kenrick, W. Johnston, Bailey, and Entick, on the second; and, notwithstanding this majority, I am of opinion that the first manner is right. For, though *maxillary* and the other similar words of this termination are of the same number of syllables with the Latin words from which they are derived, as *maxillaris, capillaris, &c.* 503, (e); yet, as our language has an aversion to the accent on the *a* in these terminations which have the accent in the Latin words, 512, it seems agreeable to our own analogy to place the stress on that syllable to which we give a secondary stress in the original word, and that is the first.—See **ACADEMY** and **MAMMILLARY. ME/DICAMENT, mèd'-è-kâ-mént. *n. s.* [medicamentum, Lat.] Any thing used in healing: generally, topical applications. *Hammond.*

§ All our orthoëpists, but Bailey, pronounce this word with the accent on the first syllable; but my judgement much fails me if the true pronunciation ought not to be with the accent on the second, as in *predicament*. My

reason is, that this is the syllable on which we place the secondary accent in pronouncing the Latin words *medicamentum* and *predicamentum*; and it has often been observed, that this is our guide for accenting English words formed from the Latin by dropping a syllable.—See **ACADEMY. W.**

MEDICAME/NTAL, mèd-è-kâ-mént'-âl. *a.* Relating to medicine, internal or topical.

MEDICA/TION, mèd-è-kâ'-shûn. *n. s.* The act of tincturing or impregnating with medicinal ingredients. *Bacon.* The use of physick. *Brown.*

MEDICINABLE, mè-dis'-sîn-â-bl. *a.* Having the power of physick. *Drant.*

MEDICINAL, mè-dis'-è-nâl, or mèd-è-sî'-nâl. *a.* [medicinalis, Lat.] Having the power of healing; having physical virtue. *Shak.* Belonging to physick. *Quincy.*

§ Dr. Johnson tells us, that this word is now commonly pronounced *medicinal*, with the accent on the second syllable, but more properly, and more agreeably to the best authorities, *medicinal*. If, by the best authorities, Dr. Johnson means the poets, the question is decided; but I look upon poets to be the worst authorities in this case, as, by the very rules of their art, a license is given them to depart from the general pronunciation; and that they often avail themselves of this license cannot be disputed. But if, by more properly, Dr. Johnson alludes to the long *i* in the Latin *medicinus* or *medicinalis*, nothing can be more inconclusive. If the word be perfectly Latin, as well as English, we generally place the accent on the same syllable as in the original, as *acumen*, *decorum*, &c., but frequently otherwise, as *orator*, *senator*, *character*, &c. But if this Latin accentuation were to be servilely followed in Latin words anglicised, we should overturn the whole fabric of our pronunciation. Thus *doctrinal*, *pastoral*, &c. &c., must have the accent on the second syllable instead of the first, and nothing but confusion would ensue. The truth is, the strong tendency of our language is to an antepenultimate accent, 503; and it is with reluctance we ever place it lower, except in words of our own composition, or where the latter syllables have either an assemblage of consonants or a diphthong; yet, even in this case, we find the antepenultimate accent sometimes prevail, as *ancestor*, *amnesty*, *magistrate*, &c., and *counterpoise*, *porcelain*, *chamberlain*, *interreign*, &c.; so that, by attempting to bring our pronunciation under the laws of the Latin language, we disturb and pervert it. Let poets, therefore, who have, and, perhaps, in some cases, ought to have, a language different from prose, enjoy the privilege of their art, and while we are reading them let us conform to their rules; but let us not strive against the general current of prosaic pronunciation, which is always right, and which is equally negligent of the peculiarities of poets and the pedantry of ancient derivation. The antepenultimate accentuation of this word is supported by Dr. Ash, Dr. Kenrick, Mr. Perry, Mr. Smith, W. Johnston, Barclay, Bailey, Fenning, and Entick. Mr. Sheridan gives both, and, by placing this accentuation first, seems to prefer it to the other.—See **INDEXICIOUS** and **INIMICAL. W.**

MEDICINALLY, mè-dis'-sè-nâl-lè. *ad.* Physically. *Burton.*

ME/DICINE, mèd'-dè-sîn. *n. s.* [medicina, Lat.] Physick; any remedy administered by a physician. *Prov. xvii.* [medecin, Fr.] A physician. *Shak.*

§ All our orthoëpists tell us, that this word is generally pronounced in two syllables, as if written *medine*. That so gross a vulgarism should gain ground in our language is an imputation on our national taste. Our poets, who, when tortured for a word, often torture a word to ease themselves, are generally guilty of one part only of the cruelty of *Procrustes*; and that is, of shortening such words as are too long for their verse; and these mutilations too often slide into our prosaic pronunciation: but against this abuse every accurate speaker ought to be on his guard. Nay, Cowley, as Mr. Nares informs us, crushes *medicinal* into two syllables; and instances from Milton of this kind are innumerable.

—nô, nôve, nôr, nôt; —tûbe, tûb, bûll; —ôil; —pôand; —thin, THIS.

Mr. Elphinston adopts the dissyllable pronunciation, as more agreeable to its immediate origin, the French *medecine*; but, as we preserve the *i* in this word, the Latin *medicina* seems its most authentic original, and demands the sound of the *i* in *medicine* as much as in *ominous*, *mutinous*, and *original*, which Shakspeare and Milton sink in the same manner as the word in question. *W.*

I differ from all our orthoëpists in the accentuation of this word [*medullary*]; for, though they are uniform here, they differ so much from each other in similar words as to show, they are not very sure of their principles. My reasons for accenting the first syllable of this word are the same as for the same accentuation of *maxillary* and *papillary*, which see. *W.*

3 F This word was universally, till of late, pronounced with the accent on the second syllable, as Dr. Johnson, W. Johnston, Dr. Kenrick, Barclay, Bailey, Buchanan, Fenning, and Perry, have marked it. Some speakers have endeavoured to pronounce it with the accent on the first, as we find it marked in Mr. Nares, Dr. Ash, Scott, and Entick: but this is an innovation unsuitable to the genius of our pronunciation; which, in dissyllables having a diphthong in the last, inclines us to place the accent on that syllable, as much as in *devoir*, which we find accented on the last by all our orthoëpists, without exception. *W.*

♂ Mr. Sheridan pronounces the *e*, in the first syllable of this word, like the *a* in *march*; and it is certain that, about thirty years ago, [i. e. 1770.] this was the general pronunciation; but since that time the sound of *a* has been gradually wearing away; and the sound of *e* is so fully established, that the former is now become gross and vulgar, and is only to be heard among the lower orders of people. It is highly probable, that, however coarse this sound of *e* may now seem, it was once not only the common pronunciation, but the most agreeable to analogy. We still find, that the vowel *e* before *r*, followed by another consonant, sinks into a broader sound by taking the short sound of *e*, which is really the short sound of a slender *a*, as *virgin*, *virtue*, &c.; and it is a similar alteration which takes place in the *e* before *r*, followed by another consonant, in *clerk*, *serjeant*, *Derby*, &c., where this vowel falls into the broader sound of the Italian *a*. *Sermon*, *service*, *vermin*, &c., are still pronounced by the vulgar as if written *sermon*, *sarvice*, *varment*, &c.; and this was probably the ancient manner of pronouncing every *e* in the same situation. This analogy is now totally exploded, and, except *clerk*, *serjeant*, and a few proper names, we have scarcely another word in the language, where the *e* has not its true sound. But instead of saying, with Mr. Nares, that *merchant* has returned to the proper sound of *e*, we may, with great probability, assert, that this and every other word of the same form have acquired a sound of *e*, which they never had before; and which, though a feebler, and a shorter sound, conduces to the simplicity and regularity of our pronunciation. Dr. Kenrick,

concurr in my opinion, that pronouncing the *e* in this word like *a* is vulgar; and every other orthoëpist, who gives the sound of the vowels, marks it as I have done. *W.*

✚ As the metaphorical sense of this word, courage and spirit, has passed into a different orthography, mettle, so the orthography of this sense has corrupted the pronunciation of the original word, and made it perfectly similar to the metaphorical one. It is almost the only instance in the language where *al* is pronounced in this manner, and the impropriety is so striking as to encourage an accurate speaker to restore the *a* to its sound, as heard in metal.—See SPITAL. *W.*

METALLINE, mèt'-tál-lìne. *a.* Impregnated with metal. *Bacon.* Consisting of metal. *Boyle.*

✚ Mr. Sheridan, Dr. Johnson, Dr. Ash, and Bailey, accent the second syllable of this word; but Dr. Kenrick, W. Johnston, Mr. Scott, Buchanan, Barclay, Fenning and Entick, the first. I do not hesitate to pronounce the latter mode the more correct; first, as it is a simple in our language, and, having three syllables, requires the accent on the antepenultimate, notwithstanding the double L. See METACINAT. In the next place, though there is no *metallinus* in Latin, it ought to follow the analogy of words of that termination derived from the Latin, as *crystallinus, serpentinus, &c.*, which, when anglicised, lose the last syllable, and remove the accent to the first. See ACADEMY.—For the *i* in the last syllable, see *Principles*, No. 143, 149. *W.*

METALLURGY, mèt'-tál-lûr-jè. *n. s.* The art of working metals, or separating them from their ore. *Warton.*

✚ This word is accented three different ways by different orthoepists. Dr. Johnson, Barclay, Fenning, and Perry, accent it on the second syllable; Sheridan, Buchanan, and Bailey on the third; and Ash, Scott, Nares, and Entick, on the first; and Kenrick on the first and third. The accent on the first seems to me the most correct. Bailey derives this word from the Greek μεταλλουργία; and words of this form, upon dropping a syllable when anglicised, remove the accent higher; as *philosophy, philology, &c.*, from φιλοσοφία, φιλολογία. The accent thus removed, in enclitic terminations, 513, generally falls upon the antepenultimate syllable, unless in the two succeeding syllables there are combinable consonants, as *chironomancy, oligarchy; &c.*, in this case, for the ease of pronunciation, the accent

generally rises to the next syllable, which throws a secondary or alternate accent on the penultimate, and, by this means, gives the organs a greater force to pronounce the uncombinable consonants than if they immediately followed the principal stress. See *Principles*, No 517, 519. *W.*

§ Authorities for the two different ways of accenting this word are so nearly balanced, that it is hard to say which preponderates. Dr. Johnson, Dr. Kenrick, Dr. Ash, Mr. Perry, Buchanan, and Bailey, are for the first; and Mr. Sheridan, Mr. Nares, W. Johnston, Mr. Scott, Mr. Barclay, Entick, and Gibbons, the author of the *Rhetorick*, for the last. In this case the ear and analogy ought to decide. I have no doubt but the accent on the first syllable was the ancient mode of pronouncing this word, as we find it so accented in almost all the systems of rhetoric published several years ago for the use of schools: and as these words from the Greek were generally pronounced in the Latin manner, that is, the accent on the antepenultimate in *metonymia*, and not on the penultimate, as in *μετωνυμία*, the secondary accent naturally fell on the first syllable, which is naturally become the principal of the English *metonymy* 503.—See *ACADEMY*. But that the ear is pleased with the antepenultimate accent cannot be doubted; and that this word has as great a right to that accent as *lipothymy*, *homonymy*, *synonymy*, &c., is unquestionable. Besides, the enclitical accent, as this may be called, is so agreeable to the ear, that, without eviden-

reasons to the contrary, it ought always to be preferred. See *Principles*, Nos. 513, 518, 519. *W.*

Ï This word, and the verb from which it is derived, are, in Ireland, pronounced with the short *i*, as Mr. Sheridan has marked it; but I am much mistaken if it is not, in England, pronounced with the long *i*, as more agreeable to the orthography. There is a character in the farce of the Stage Coach, written by Farquhar, called *Micher*, and this I recollect to have heard with the *i* pronounced long. *W.*

MILLEPED, mil'-lê-pêd. *plur.* **MILLEPEDES**, mil'-lê-pêdz, or mil-lêp'-ê-dêz. *n. s.* [mille and pes, Lat.] A species of the wood-louse, so called from its numerous feet; the palmer-worm also has this name. *Mortimer.*
THE former pronunciation of this word is adopted by Dr. Johnson, Dr. Kenrick, Mr. Sheridan, Mr. Scott, and Entick; and the latter by Mr. Nares, W. Johnston, Buchanan, and Perry. That the latter is the more fashionable cannot be denied; but that the former is the more correct is evident, from similar words which have been anglicised: thus *bipeds* and *quadrupeds* have dropped their Latin final syllable; and why the word in question should retain it cannot be conceived. Besides, though seldom used in the singular, there is no reason why it should not be so used; and then it must necessarily become *miltiped*: *centipede*, properly *centiped*, is adopted; and, by forming *centipeds* in the plural, shows us how we ought to form and pronounce the word in question; and if *antipodes* has not yet submitted to this analogy, it is because, like *cantharides*, *caryatides*, *manes*, &c. it is never used in the singular.—See *ANTIPODES*. *W.*

MINE, mîne. *pronoun poss.* [mÿn, Sax.] Belonging to me. *St. Luke*.

☞ In reading the Scripture, as, "*Mine eyes have seen thy salvation*," we are at no loss for the pronunciation of this word, as the dignity and solemnity of the composition invariably direct us to give the *i* its long sound, as in *fine, line, &c.*; but in *Milton* and other authors, where there is no such dignity or solemnity, this sound of the word has an intolerable stiffness, and ought not to have been used. Thus, in the *Spectator*, No. 195, Mr. Addison says: "Were I to prescribe a rule for 'drinking, it should be formed upon a saying quoted by 'Sir William Temple: 'The first glass for myself, the second for my friends, the third for good humour, and the fourth for mine enemies.'" In *Milton* too:

"Close at mine ear one called me forth to walk."

Par. Lost.

In *Shakspeare* also:

"Sleeping within mine orchard,
"My custom always in the afternoon,

"Upon my secure hour thy uncle stole,
"With juice of cursed hebona in a phial,
"And in the porches of mine ears did pour
"The leprous distilment."—

Hamlet.

In all these instances, we find a formality, a staleness, and uncouthness of sound, that is peculiarly unpleasant to the ear; and as this mode of writing was introduced when our language may be said to have been in its infancy, for the sake of euphony, (for it is clearly ungrammatical;) so now, when it may be said that it has arrived at its maturity, the very same reason seems to entitle the present age to alter it; that is, I mean, the pronunciation of it, by substituting *my*, pronounced like *me*, in its stead.

The disagreeable sound which *mine* has in these cases, has induced several readers to pronounce it *min*; but, by thus mincing the matter, (if the pun will be pardoned me,) they mutilate the word, and leave it more disagreeable to the ear than it was before. Readers, therefore, have no choice, but either to pronounce it as it is written, and to let the author be answerable for the ill sound; or, in all language but that of Scripture, to change it into *my*, pronounced like *me*.

Shakspeare seems to have used this word ludicrously in the Merry Wives of Windsor, where Falstaff says, "*Mine* host of the Garter—truly, *mine* host, I must 'turn away some of my followers;" and the host, by requesting Falstaff to speak scholarly and wisely, seems to intimate, that this use of the word *mine* before a vowel or an *h* was the most correct way of speaking. But though *thyl* will, in familiar or ludicrous language, admit of being changed into the sound of *the*—*mine* will, on no occasion, suffer an alteration into *min*. When the vowel is used familiarly, it is always a burlesque upon the grave use of it, and therefore requires the grave sound, that the humour may not be lost. *W.*

¶ I have differed from Mr. Sheridan in the sound of the first syllable of this word, as he seems to have adopted a vulgar pronunciation, which does not distinguish between the sound of *i*, succeeded by single or double *r*, not final; and the sound of *i* final, or succeeded by *r* and another consonant. In the former case, the *i* is pure, and has exactly the same sound as its representative *y* in *pyramid*, *lyrick*, &c.; in the latter, the *i* goes into short *e* or *u*, as in *birth*, *virtue*, &c. or *sir*, *stir*, &c.—See *Principles*, No. 108, 109, 110. *W.*

MIS, mîs. An inseparable particle, used in composition to mark an ill sense, or deprivation of the meaning: as, *chance*, luck; *mischance*, ill luck. [mes, Teut. and Fr.; mîr, Sax.]

¶ What is remarkable in the pronunciation of this inseparable preposition is, that the *s*, whether the accent be on it or not, or whether it be followed by a sharp or flat consonant, always retains its sharp, hissing sound, and never goes into *z*, like *dis* and *ex*. The reason seems to be that the latter come to us compounded, and have their meaning so mingled with the word as to coalesce with it, while *mis* remains a distinct prefix, and has but one uniform meaning. *W.*

§ Mr. Sheridan is the only lexicographer, who gives the sounds of the letters, that has inserted this word, except Mr. Barclay. The former spells the word *mnemonicks*, and leaves us to pronounce the first syllable as we can; while the latter leaves out the *m*, and spells the word *nemonicks*; which, in my opinion, is the way it ought to be pronounced. *W*.

MOB §, mòb. *n. s.* [contracted from *mobile*, Lat.] The crowd; a tumultuous rout. *Dryden*.
§ Tollet tells us, that, in the latter end of the reign of King Charles II., the rabble that attended the Earl of Shaftesbury's partisans was first called *mobile vulgus*, and afterwards, by contraction, the *mob*; and ever since the word has become proper English. To which we may add, that, in Mr. Addison's time, this word was not adopted; for he says (Spectator, No. 135.) "I dare not answer that *mob*, *rep*, *pos*, *incog*, and the like," will not in time be looked upon as a part of our tongue. *W*.

TO MOBLE, mò'-bl. [mòb'-bl, *Sheridan*.] *v. a.* To wrap up, as in a hood. *Shakespeare*.
§ This word now exists, as spoken, nowhere but in the Hamlet of *Shakespeare*:
 "But who, alas! had seen the mobled queen!"
 This is always pronounced *mobbed* upon the stage, and this reading appears more correct than *mobled* and *mob-led*, which some critics have substituted; for Dr. Farmer tells us he has met with this word in *Shirley's Gentleman of Venice*:
 "The moon does moble up herself"
 This seems to receive confirmation from the name women give to a cap, which is little more than a piece of linen drawn together with string round the head. The learned Mr. Upton's supposition, that this word signifies *led by the mob*, is an anachronism, as the word *mob* was not in use in the time of *Shakespeare*. *W*.

37 Mr. Sheridan and Mr. Nares are the only orthoepists who determine the quantity of the first vowel in this word; which they do by making it short. The only reason that can be given is the omicron in the Greek *μνάς*; and what a miserable reason is this, when, in our pronunciation of the Greek word, we make it long!—See *Principles*, No. 543, 544, &c. *W.*

Why Mr. Sheridan should pronounce dialogue with the last syllable like log, prologue with the same syllable like lug, and monologue rhyming with vogue, I cannot conceive. The final syllable of all words of this termination, when unaccented, is, in my opinion, uniformly like that in dialogue. Mr. Scott has marked it in the same manner as I have done; Mr. Barclay has followed Mr. Sheridan. W.
MONOMACHY, [MONO'MACHY, Todd.] mò-nôm'-â-kê. *n. s.* [μονομαχία.] A duel; a single combat. *Burton.*
Nothing can more show the uncertainty of our orthoëpists in the pronunciation of unusual words, than the accentuation of this, and those of a similar form. The only words of this termination we have in John

—nò, mōve, nòr, nòt;—tùbe, túb, báll;—ðil;—pòund;—ðin, THIS.

son's Dictionary, are, *logomachy*, *monomachy*, *sciomachy*, and *theomachy*; the two first of which he accents on the first syllable, and the two last on the second. Mr. Sheridan has but two of them, *logomachy* and *sciomachy*; the first of which he accents on the first syllable, and the last on the second. Mr. Scott has none of them. Dr. Ash has them all; and accents *logomachy*, *monomachy*, and *theomachy*, on the first syllable, and *sciomachy* on the second. Bailey accents *monomachy* and *sciomachy* on the first syllable, and *logomachy* and *theomachy* on the third. W. Johnston has only *logomachy*, which he accents on the second syllable. Mr. Perry has only *theomachy*, which he accents on the second likewise. Entick has them all, and accents them on the first; and Dr. Kenrick accents them all on the second syllable.

This confusion among our orthoëpists plainly shows the little attention which is paid to analogy; for this would have informed them, that these words are under the same predicament as those ending in *graphy*, *logy*, &c., and therefore ought all to have the antepenultimate accent. An obscure idea of this induced them to accent some of these words one way, and some another; but nothing can be more evident than the necessity of accenting all of them uniformly on the same syllable.—See *Principles*, No. 513, 518, &c.

As to Dr. Johnson's observation, which is repeated by Dr. Kenrick and Mr. Nares, that *sciomachy* ought to be written *skiomachy*, I have only to observe, at present, that writing a instead of o is more agreeable to etymology; but changing c into k, either in writing or pronouncing, is an irregularity of the most pernicious kind, as it has a tendency to overturn the most settled rules of the language.—See *SCRIPTICK*, and *Principles*, No. 350. *W.*

§ The second pronunciation, which is Dr. Johnson's, Dr. Ash's, Mr. Barclay's, and Entick's, is the most usual; but the first, which is Mr. Sheridan's, is more agreeable to analogy; for the word is derived from *monoptōton*, which we pronounce with two accents, one on the first, and another on the third; and, when we shorten the word by anglicising it, we generally place the accent on the syllable we accented in the original.—See *HETEROCLITE*. *W.*

✂ There is an incorrect pronunciation of this and similar words, chiefly among the vulgar, which is, sound-

ing the word as if it were written *mo-ould*. This sound is often heard among incorrect speakers, where there is no diphthong, as in *cold*, *bold*, *sold*, &c., pronounced *co-ould*, *bo-ould*, *so-ould*, &c., while the true pronunciation of these words has nothing of the *u* or *oo* in it, but is exactly like *foal'd*, *sol'd*, *cajol'd*, &c., the preterits of the verbs to *foal*, to *sole*, and to *cajole*, &c. For there is no middle sound between *oul* and *hole*; and the words in question must either rhyme with *hoal'd* or *foal'd*; but the last is clearly the true pronunciation.

This word, before Dr. Johnson wrote his dictionary, was frequently written *mold*, which was perfectly agreeable to its Saxon derivation, and was less liable to mispronunciation than the present spelling. The word has three significations: *mould*, concretions occasioned by decay; whence to *moulder*, to waste away: *mould*, or earth, that to which decay reduces bodies: and a *mould*, a form to cast metals in. A diversity of pronunciation has endeavoured to distinguish the first of these senses from the rest, by sounding it so as to rhyme with *hoal'd*; but these distinctions of sound under the same spelling, ought to be, as much as possible, avoided. For the reasons, see *Bowl*. *W.*

¶ The vowel *u*, in the first syllable of this and similar words, forms a remarkable exception to the shortening power of the antepenultimate and secondary accent.

Any other vowel but *u*, unless followed by a diphthong, would have been short. This arises from no regard to the Latin quantity in the word *muculentus*; for the *u* in *culinary* and *mutilate*, &c., is long in English, though short in the Latin *culinaris*, *mutilo*, &c. So that the long *u* in this, and similar words, is an idiom of our own pronunciation. 508, 511, 530. *W.*

MY, ml, or mè. *pronoun poss.* Belonging to me. *Spenser.*

☞ There is a puzzling diversity to foreigners in the pronunciation of this word, and sometimes to natives, when they read, which ought to be explained. It is certain that the pronoun *my*, when it is contradistinguished from any other possessive pronoun, and consequently emphatical, is always pronounced with its full, open sound, rhyming with *fly*: but, when there is no such emphasis, it falls exactly into the sound of *me*, the oblique case of *I*. Thus, if I were to say, *My pen is as bad as my paper*, I should necessarily pronounce *my* like *me*, as, in this sentence, *pen* and *paper* are the emphatical words; but, if I were to say, *My pen is worse than yours*, here *my* is in opposition to *yours*, and must, as it is emphatical, be pronounced so as to rhyme with *high*, *nigh*, &c. *W.*

☞ It may not, perhaps, be unworthy of observation, that *y*, in this and the following words, is under the same predicament as *i*: if followed by *r* and a vowel, it is short *i*; if by *r* and a consonant, it becomes short *e*, which is the cause of the difference in the first syllable of *myriad* and *myrmidon*.—See *Principles*, No. 103, 109. *W.*

[F] There is a vulgar pronunciation of this word as if written *na-ter*, which cannot be too carefully avoided. Some critics have contended, that it ought to be pronounced as if written *na-te-gure*; but this pronunciation comes so near to that here adopted, as scarcely to be distinguishable from it. T before y, which is the letter long u begins with, approaches so near to sh, as, in the absence of accent, naturally to fall into it, in the same manner as s becomes sh in *leisure*, *pleasure*, &c. The sibilant and aspiration of t, in this and similar words, provided they are not too coarsely pronounced, are so far from being a deformity in our language, by increasing the number of hissing sounds, as some have insinuated, that they are a real beauty; and, by a certain concourse and flow of sound, contribute greatly to the smoothness and volubility of pronunciation.—See *Principles*, No. 459, 460, 461, &c. W.

¶ In this word of our own composition from *nice*, we have unaccountably run into the pronunciation of the mute *c*. This word we always hear pronounced in three syllables, though *safety*, *minety*, and *surety*, are ever heard in two. This is a proof how much more similitude of sound often operates in fixing pronunciation; the termination *ty* being almost always preceded by *e* or *i* in words of Latin or French formation, where these vowels form a distinct syllable; as, *variety*, *gayety*, *anxiety*, *society*, &c. Words of mere English formation, that approach to them, are thus carried into the same pronunciation by bare likeness of sound only. *W.*

§ *W. Johnston and Entick are the only orthoëpists who adopt the first mode of accenting this word; while Dr. Johnson, Dr. Ash, Mr. Sheridan, Dr. Kenrick, Buchanan, Perry, and Barclay, adopt the last. Mr. Scott adopts both, but seems to give the latter the preference by placing it first. The accentuation of this word must be determined by that of obdurate, from which it is derived. It seems, however, to follow the example of accuracy, procuracy, &c., in throwing the accent on the first syllable. As there are some terminations which seem to attract the accent to the latter syllables, as ator, end, &c., as spectator, observator, &c., comprehend, apprehend, &c., so there are others that seem to repel it to the beginning of the word, as acy, ary, &c., as efficacy, optimacy, contumacy, &c., salutary, tributary, adversary, &c. The word in question seems to be of the latter class, and therefore more analogically pronounced with the accent on the first than on the second syllable.—See OB'DURATE. W.*

OB'DURATE §, ôb-jû-râte, or ôb-dû'-râte. 91, 293, 294, 503. *a.* [obduratus, Lat.] Hard of heart; inflexibly obstinate in ill; hardened; impenitent. *Shak.* Hardened in firm; stubborn. *Hooker.* Harsh; rugged.

§ This word is pronounced with the accent on the second syllable by Dr. Johnson, Mr. Sheridan, Dr. Kenrick, Dr. Ash, Mr. Nares, Mr. Elphinston, Mr. Barclay, Buchanan, and Mr. Perry; and on the first by Bailey, Entick, and W. Johnston. Mr. Scott accents it either on the first or second, but seems to give the preference to the latter. The poets are decidedly in favour of the penultimate accent; and when the usage of poetry does not contradict any plain analogy of prosaick pronunciation, it certainly has a respectable authority. But the verb to indurate is a word of exactly the same form, and has the same derivation; and yet Dr. Johnson, Mr. Sheridan, Dr. Kenrick, Mr. Scott, W. Johnston, Barclay, and Entick, place the accent on the first syllable: and my observation fails me if there is not a strong propensity in custom to place the accent on the first syllable of the word in question. This propensity, as there is a plain analogy in favour of it, ought, in my opinion, to be indulged. To indurate is a verb derived from the Latin indure, forming its participle in atus; and words of this kind are generally anglicised by the termination ate, and have the accent at least as high as the antepenultimate: thus, from depuro, propago, desolo, &c., are formed depurate, to propagate, to desolate, &c., and, without recurring to the Latin induratus, we form the regular participle indurated from the verb to indurate. But, though there is the Latin verb obdure, we have not formed an English verb from it in ate, as in the former case, but derive the adjective obdurate from the Latin participial adjective obduratus; and no analogy can be more uniform than that of removing the accent two syllables higher than in the original: thus, desperate, profligate, and defecate, have the accent on the first syllable, and desperatus, profligatus, and defecatus, on the third. Agreeably, therefore, to every analogy of derivation, obdurate ought to have the accent on the first syllable; and, as poets have adopted the other ac-

centuation, we must, as in medicinal, and in some other words, admit of a poetical and a prosaick pronunciation, rather than cross so clear an analogy in favour of poetry, which is so frequently at variance with prose, and sometimes with itself.—See ACADEMY and INCOMPARABLE. W.

TO OB'DURATE §, ôb-jû-râte, or ôb-dû'-râte. *v. a.* To harden; to make obdurate. *More.*

OBEDIENCE, ôb-ê'-jè-ênse. 203, 376. *n. s.* [obediencia, Fr.] Obsequiousness; submission to authority. *Rom. vi.*

§ The *o*, which forms the first syllable of this word, though not under the accent, may occasionally be pronounced as long and open as the *o* in oval, over, &c., (see EFFACE); and though in rapid pronunciation it admits of a short, obscure sound, common to some of the other vowels when unaccented, yet its radical sound, or that which it acquires on the least distinctness or solemnity, is undoubtedly the long, open *o* before mentioned. Thus in that fugitive pronunciation, which has no existence but in the ear, and can hardly be expressed to the eye by a correspondent sound, we perceive very little difference in the sound of the initial vowels of abound, upbraid, and obedience; yet, the moment we dwell with the least distinctness on these letters, the *a*, in abound, verges to the *a* in father; the *u* has the short sound we hear in the preposition up; and the *o* in obedience becomes open, as the first sound of that letter in the alphabet. The same may be observed of the *o* in opaque, opinion, and every initial *o* ending a syllable immediately before the accent.—See Principles, No. 98. W.

OBEDIENT §, ô-bê'-jè-ênt. *a.* [obediens, Lat.] Submissive to authority; compliant with command or prohibition; obsequious. 2 Cor. ii.

OB'EISANCE, ô-bâ'-sânse. 250. *n. s.* [obseisance, Fr.] A bow; a courtesy; an act of reverence made by inclination of the body or knee. 1 Kings, i.

§ I must retract my former pronunciation of this word, which made the diphthong *ei* like *e* in obedience, and adopt the sound of *a* as in the *ey* of obey. For the former sound we have Mr. Sheridan, Dr. Kenrick, and Mr. Perry; and for the latter Mr. Nares, Mr. Elphinston, Mr. Scott, and W. Johnston. But, if the authorities for this pronunciation were less weighty than they are, analogy would be clearly on the side I have adopted, as *ei*, when under the accent, is much more frequently pronounced like *ey* in obey than like *ey* in key; the latter word and key being the only exceptions to the general rule of pronouncing *ey* when accented; and these letters, we know, are perfectly equivalent to *ei*. 296. Q— What was observed of the *e* in *efface* is applicable to the *o* in the first syllable of this word. From the tendency of the vowel to open, when immediately preceding the accent, we find elegant speakers sometimes pronounce the *o* in *occasion*, *offend*, *officious*, &c., as if written *o-casion*, *o-fend*, *o-ficious*, &c. This seems to be one of those "faults true critics dare not mend." But, as it is an evident deviation from the orthography, I have not dared to mark these words in this manner.— See *EFFACE*. It must, however, be remarked, that this deviation only takes place before double *c* in the word *occasion* and its compounds. *W.*

nis and presentia, Lat.] Ubiquity; unbounded presence. Milton.

§ All the orthoëpists I have consulted, (as far as can be gathered from their notation and accentuation,) make the penultimate *e* in this word short, as in the word *presence*, except Mr. Sheridan. That it is not pronounced enclitically, like *omnipotence*, 513, 518, arises, perhaps, from the number of consonants in the latter syllables; and, as this is the case, it seems most agreeable to the nature of our composition to pronounce *presence*, in this word, in the same manner as when it is taken singly: just as we pronounce *theatre*, in the word *amphitheatre*, with the accent on the antepenultimate, though the accent is on the penultimate, and the vowel is long, in the Latin *amphitheatrum*. *W.*

☞ This word and its relatives, once and none, are, perhaps, the best tests of a residence in the capital. In some parts of the island, they are pronounced so as to give the o the sound it has in tone, sometimes the sound it has in gone; but the true sound is that it has in son, done, &c., which is perfectly equivalent to the sound of u in sun. I never could make a northern inhabitant of England pronounce the following sentence without the greatest difficulty: "I have won one game, and

you have won none; you have not won once, and that is wonderful!" where we may observe, that the o in won is the exact sound it has in one, once, and wonderful. *W.*

OPHTHALMICK, ôp-thâl'-mîk. *a.* Relating to the eye.

Two aspirations in succession, says Mr. Elphinston, seem disagreeable to an English ear, and therefore one of them is generally sunk. Thus *diphthong* and *triphthong* are pronounced *diphthong* and *triphthong*. *P* is lost, as well as *h*, in *apophthegm*; and therefore it is no wonder we hear the first *h* dropped in *ophthalmic* and *ophthalmick*, which is the pronunciation I have adopted as agreeable to analogy. Nay, such an aversion do we seem to have to a succession of aspirates, that the *h* is sunk in *isthmus*, *Esther*, and *Demosthenes*, because the *s*, which is akin to the aspiration, immediately precedes. Mr. Sheridan pronounces the first syllable of this word like *off*; but the first of *diphthong* and *triphthong* like *dip* and *trip*. Mr. Scott, W. Johnston, and Mr. Perry, have not got this word, but pronounce *diphthong* and *triphthong* in the same manner as Mr. Sheridan. Dr. Kenrick also wants the word; he gives no pronunciation to *diphthong*, but makes the *h* silent in *triphthong*; while Barclay pronounces the *h* in *ophthalmick*, but makes it either way in *diphthong*, and silent in *triphthong*. It may be remarked, that Dr. Jones, who wrote a spelling dictionary in Queen Anne's time, makes the *h* in these two words silent. *W.*

Dr. Johnson, Mr. Sheridan, Dr. Ash, Mr. Scott, Entick, Barclay, and Buchanan, accent this word on the first syllable; and Dr. Kenrick, Bailey, W. Johnston, and Mr. Perry, on the second. That the last is more general, particularly in grammar schools, will be readily acknowledged; but that the first is more correct and agreeable to analogy, cannot be denied: for this word is not so naturally derived from the classical *optatus* as the lower Latin *optativus*: and why this word should transfer its penultimate accent to the first syllable of the English word may be seen under the words *ACADEMY*, *INCOMPARABLE*, &c. *W.*

Orchestra is accented on the first syllable by Dr.
 Johnson, Mr. Sheridan, Dr. Ash, Mr. Scott, Mr. Nares,
 Buchanan, Entick, Perry, and Barclay; and by Mr. Bai-
 ley and W. Johnston on the second; and by Dr. Kenrick
 on either. The first mode has not only the majority of
 votes in its favour, but is agreeable to the general anal-
 ogy of words of three syllables, which, when not of our
 own formation, commonly adopt the antepenultimate
 accent. The exception to this rule will be found under
 the next word.

Orchestra is accented on the first syllable by Dr. Ash,
 Mr. Scott, Mr. Perry, Entick, and Barclay; but Mr.
 Nares says it is accented on the second, as I have given
 it. For, notwithstanding the numbers against me, the
 very general rule is on my side; which is, that, when
 we adopt a word whole from the Latin or Greek, it
 ought to have the same accent as in those languages.—

ORION*, ôr'-rî-ûn. n. s. [Lat.] One of the constellations of the southern hemisphere. *Milton*.

O'RISON, ôr'-rè-zûn. 168. n. s. [old Fr.] A prayer; a supplication. *Shakspeare*.

Mr. Sheridan has adopted the other spelling, from the French *oraison*; but Dr. Johnson, and all the writers he quotes, spell the word in the manner I have done. Dr. Johnson tells us this word is variously accented; that Shakspeare has the accent both on the first and second syllables, Milton and Crashaw on the first, and others on the second:

"The fair Ophelia! Nymph, in thy orisons

"Be all my sins remembered." *Hamlet*.

"Alas! your too much love and care of me

"Are heavy orisons 'gainst this poor wretch."

Henry the Fifth

"My wakeful lay shall knock

"At th' oriental gates, and duly mock

"The early lark's shrill orisons to be

"An anthem at the day's nativity." *Crashaw*

"His daily orisons attract our ears." *Sandys*

"Lowly they bow'd, adoring, and began

"Their orisons, each morning duly paid." *Milton*

"So went he on with his orisons;

"Which, if you mark them well, were wise ones." *Cotton*

"Here, at dead of night,

"The hermit oft, 'mid his orisons, hears,

"Aghast, the voice of time disparting tow'rs."

Dyer

"The midnight clock attests my fervent prayers,

"The rising sun my orisons declares." *Harte*.

Mr. Nares tells us he has no doubt that Milton's accentuation is right. This, too, is my opinion. Poets are not the best authorities, even when they are unanimous; but much worse when they differ from others, and even from themselves. We must, therefore, leave them the liberty of accenting both ways, either for the sake of the verse, the rhyme, the humour, or the affectation of singularity, and bring our reason for accenting this word in prose on the first syllable, from the very general rule in *Principles*, No. 503. Accordingly, Mr. Elphinston, Mr. Sheridan, Mr. Scott, Dr. Kenrick, Buchanan, W. Johnston, Barclay, Bailey, Perry, and Enck, uniformly place the accent on the first syllable; but Dr. Ash says it is sometimes accented on the second. *W.*

Mr. Perry, Buchanan, and Entick, pronounce the *a* in the first syllable long, like that in *page*; but Mr. Sheridan, Dr. Kenrick, Mr. Scott, and Mr. Nares, make it short, as in *pad*. ☞ There is a set of words, of similar derivation and ter-

mination, which must be necessarily accented in the same way: these are *axillary*, *maxillary*, *capillary*, *papillary*, *pupillary*, *armillary*, *mammillary*, and *medullary*. All these, except the last, which was not inserted, I had accented on the first syllable in a Rhyming and Pronouncing Dictionary published thirty years ago [about 1770].

This accentuation I still think the most agreeable to analogy; and, that the inspector may judge of the usage, I have subjoined the several different modes of accentuation of the different orthoëpists:

| | |
|---------------------|---|
| <i>Axillary</i> , | Johnson, Kenrick. |
| <i>Axillary</i> , | Sheridan, Ash, Bailey. |
| <i>Maxillary</i> , | Johnson, Sheridan, Barclay. |
| <i>Maxillary</i> , | Ash, Kenrick, W. Johnston, Bailey, Entick. |
| <i>Capillary</i> , | Johnson, Kenrick, Nares, Fenning. |
| <i>Capillary</i> , | Sheridan, Ash, W. Johnston, Perry, Buchanan, Bailey, Entick. |
| <i>Papillary</i> , | Johnson, Nares, Barclay, Fenning. |
| <i>Papillary</i> , | Sheridan, Kenrick, Ash, Scott, Perry, Buchanan, Bailey. |
| <i>Pupillary</i> , | Johnson, Sheridan, Kenrick, Ash, Scott, Perry, Entick, Barclay, Fenning. |
| <i>Pupillary</i> , | No examples. |
| <i>Mammillary</i> , | Nares, Bailey. |
| <i>Mammillary</i> , | Johnson, Kenrick, Ash, Sheridan, Scott, Perry, Entick. |
| <i>Armillary</i> , | Sheridan, Scott, Nares, Smith, Fenning. |
| <i>Armillary</i> , | Ash, Perry, Entick, Bailey, Barclay. |
| <i>Medullary</i> , | No examples. |
| <i>Medullary</i> , | Johnson, Sheridan, Ash, Kenrick, W. Johnston, Buchanan, Bailey, Barclay, Fenning, Entick. |

This extract sufficiently shows how uncertain usage is, and the necessity of recurring to principles: and that these are on the side I have adopted, may be gathered from No. 512.—See MAMMILLARY and MAXILLARY. *W.*

PA/PILLOUS, pâ-pîl'-lôs. The same with *papillary*. *3C* There is some diversity in the accentuation of this word, as well as the former: Dr. Johnson and Barclay place the accent on the first syllable; and Mr. Sheridan, Dr. Kenrick, Dr. Ash, and Mr. Perry, on the second, as I have done. *W.*

Dr. Johnson, in the folio edition of his dictionary places the accent on the penultimate syllable of this word, and Mr. Sheridan and Mr. Nares on the antepenultimate, and the latter make the *e* long. ✚ All our orthoëpists agree in accenting this word on the first syllable. Mr. Nares says, Dr. Johnson has improperly accented this word on the last; but, both in the folio edition of his dictionary, and the quarto, printed since his death, the accent is on the first. There is not the same uniformity in the accentuation of the companion to this word, *artisan*; for, though Mr. Nares, Mr. Perry, Dr. Ash, W. Johnston, Buchanan, Bailey, Fenning, and Entick, accent the first syllable, Dr. Johnson, in both editions of his dictionary, Mr. Sheridan, Mr. Scott, and Mr. Barclay, accent the last; and Dr. Kenrick places an accent on both first and last. The same diversity appears in the accentuation of *courtesan*, a word of exactly the same form; which is accented by Mr. Sheridan, Mr. Scott, W. Johnston, Mr. Nares, Fenning, and Entick, on the last syllable; and by Dr. Ash, Dr. Kenrick, Buchanan, Barclay, Bailey, and Fenning, on the first; and by Mr. Perry both on the first and last. The truth is, these three words are among those which admit of the accent either on the first or last syllable, and this has produced the diversity we find in our dictionaries, 524. The accent on

—nô, môve, nôr, nôt; —tûbe, tâb, bâll; —ôil; —pôund; —thin, THIS.

the first syllable seems the most agreeable to our analogy, and ought to be preferred. 503. *W.*

§ Mr. Sheridan has suppressed the *g* in this word as in *gnomon*, without considering that, when a syllable precedes, the *g* unites with it, and is to be pronounced. Thus this letter is mute in *sign*, but pronounced in *signify*. The same may be observed of *resign* and *resignation*, *indign* and *indignity*, &c. *W.*

☞ All our orthoëpists give this word, both as noun and verb, the accent on the last syllable, except Mr. Nares, who wishes to reduce it to the accidental distinction so often observed. 492. Johnson's folio edition has the accent of both words on the first, but the quarto accents both on the last; and this accentuation, it is certain, is the most received among the polite world. *W.*

To PATRO/L, pâ-trôle'. *v. n.* [*patrouiller*, Fr.] To go the rounds in a camp or garrison. *Blackmore.*

PA/TRONAL, pâ-trô-nâl. *a.* [*patronus*, Lat.] Protecting; supporting; guarding; defending; doing the office of a patron. *Brown.*

☞ This word, like *matronal*, has a diversity of pronunciation in our dictionaries, which shows the necessity of recurring to principles, in order to fix its true sound. Buchanan places the accent on the first syllable; but whether he makes the *a* long or short, cannot be known. Dr. Ash places the accent on the same syllable; and, though he makes the *a* in *matronal* short, yet he makes the same letter in this word long, as in *patron*. Barclay and Fenning lay the stress upon the first of *matronal* and on the second of *patronal*. Perry and Entick place the accent on the first of both these words, but make the *a* in *matronal* long, and the same letter in *patronal* short. Bailey accents the second syllable of this word. *W.*

☞ I am well aware of the shortening power of the antepenultimate accent in *patronage*, *patronise*, &c., but cannot, as Mr. Sheridan, Mr. Scott, W. Johnston, Dr. Kenrick, and Mr. Perry, have done, allow it that power in *patroness*, because the feminine termination *ess* is as much a subjunctive of our own as the participial terminations *ing* or *ed*, or the plural number, and therefore never ought to alter the accent or quantity of the original word.—See *Principles*, No. 386, 499. *W.*

☞ Mr. Nares tells us, that this word throws the accent back to the fourth syllable from the end, though the derivation demands it otherwise. I am sorry to differ from so judicious an orthoëpist; but cannot conceive that derivation requires the same accent as in *durable*, since this word is, like many others, considered as a simple, derived from the Latin *perdurabilis*, which, though not a classical word, is formed in the Latin analogy, and has the same effect on English pronunciation as if it came to us whole; which effect is to place the accent in the Anglicised word on that syllable which had a secondary accent in Latin, and that is the first.—See **ACADEMY** and **INCOMPARABLE**.

The reason that such a formative as *perdurabilis* may be admitted as the parent of *perdurable*, and not *interferio* that of *interference*, is, that we form *interference* from the verb to *interfere*, rather than from *interferio*, which is not a Latin word, though, perhaps, in the Latin analogy of formation; but we have no verb to *perdure*, from which to form *perdurable*, and therefore allowably follow the Latin analogy of formation, and the English analogy of pronouncing such formatives.—See **INTER**

—nò, mòve, nòr, nòt; —tùbe, túb, búll; —óil; —póund; —thin, THIS.

PERENCE. Poetical authorities are decidedly in favour of this accentuation:

"O perdurable shame! let's stab ourselves."

Shakspeare.

"_____ the vig'rous sweat

"Doth lend the lively springs their perdurable heat."

Drayton.

"Why would he, for the momentary trick,

"Be perdurably fin'd?—Shakspeare.

§ If we consult our orthoëpists, there can scarcely be any two pronunciations more equally balanced than those that are given to this word. Mr. Sheridan, Mr. Nares, Mr. Smith, Dr. Ash, W. Johnson, Mr. Scott, and Entick, are for the first; and Dr. Johnson, Dr. Kenrick, Bailey, Buchanan, Barclay, Fenning, and Perry, for the last; but, notwithstanding the last has these authorities to support it, I am much mistaken if the first has not obtained a complete victory. That there is a strong tendency, in words of this kind, to draw the accent high, is evident; it is as evident, likewise, that those polysyllables, which we derive from the Latin, incline to accent that syllable on which we place a secondary accent in pronouncing the original, (see **ACADEMY** and **DISPUTABLE**;) and, provided there are no clusters of uncombable consonants in the latter syllables, there is no reason why this accentuation should be checked. This is the case with the word in question; the *p* is mute, *t* is easily pronounced after *em*, and the whole termination is sufficiently smooth and voluble: but in *perfunctory* the case is different; the uncombable consonants *net* are not to be pronounced without considerable difficulty, if we place the accent on the first syllable; and therefore this accentuation ought to be avoided as much as in *corruptible*, which see. The poets incline to the side I have adopted:

"To-morrow be in readiness to go;

"Excuse it not, for I am *peremptory*."—Shakspeare.

"If I entertaine

"As *peremptorie* a desire, to level with the plains

"A citie, where they lov'd to live; stand not betwixt
"my ire

"And what he aims at."—Chapman.

To PERFORM §, pèr-fòrm', or pèr-fòrm'. *v. a.* [*performare*, Ital.] To execute; to do; to discharge; to achieve an undertaking; to accomplish. *Sidney.*

§ There is a wanton deviation from rule in the pronunciation of this word and its derivatives, which calls aloud for reformation. Pronouncing the last syllable like *form*, a seat, is a gross departure from analogy, as will appear by comparing it with the same syllable in *reform*, *conform*, *inform*, *deform*, *transform*, &c. This error seems chiefly confined to the stage, where it probably originated. It is not unlikely that some affected actor, to give the word a foreign air, first pronounced it in this manner; though, in justice to the stage, it ought to be observed, that it has less of this affectation than any theatre of elocution in the *King dom*. *W.*

☞ Fenning, Perry, Entick, Dr. Johnson, Buchanan, W. Johnston, and Kenrick, place the accent on the last syllable of this word, either when a substantive or a verb. As a substantive, Scott places the accent either on the first or last, and Sheridan on the first. Mr. Nares has shown at large, that the poets accent the substantive both ways; but the analogy of dissyllable nouns and verbs seems now to have fixed the accent of the substantive on the first, and that of the verb on the last. *W.*

To **PERFUME**, pêr-fû-me'. *v. a.* To scent; to impregnate with sweet scent. *Shakespeare.*

☞ I have differed from Mr. Sheridan and W. Johnston, who accent this word on the first syllable; but have Dr. Johnson, Dr. Ash, Mr. Nares, Barclay, Fenning, Bailey, Buchanan, and Entick, on my side for accenting the second; and this pronunciation, without any authority, would be more eligible than the other, from the difficulty of pronouncing the uncombinable consonants in the last syllables without the assistance of accent, especially when we consider that the adverb *perfunctorily* and the possible abstract noun *perfunctoriness* must necessarily have the same accent as the adjective.—See **PEREMPTORY**, **IRREFRAGABLE**, and **CORRUPTIBLE**. *W.*

§ Mr. Nares observes, that this word was anciently written *persever*, and accented on the second syllable:

" say thou art mine.

" My love, as it begins, so shall persevere."

All's well, &c. Act IV.

" Persever not, but hear me, mighty kings."

King John, Act II.

" But in her pride she doth persevere still." *Spenser*
But that, before the time of Milton, the spelling and accentuation had been changed.

" Whence heavy persecution shall arise

" Of all who in the worship persevere

" Of spirit and truth." *Par. Lost*, XII. v. 532.

As this word is written at present, there can be no doubt of its pronunciation; and that it is very properly written so, appears from other words of the same form—*declare, respire, explore, procure*, &c., from *declaro, respiro, exploro, procuro*, &c.; and consequently from *persevero* ought to be formed *persevere*: not one of our orthoëpists place the accent on the second syllable; yet, such is the force of prescription, that the old pronunciation is not entirely rooted out, especially in Ireland, where this pronunciation is still prevalent. *W.*

PERSONABLE, pèr-sûn-â-bl. *a.* Handsome; graceful; of good appearance. *Raleigh*. [In law.] One that may maintain any plea in a judicial court. *Ainsworth*.

§ As the *o* in *person* is sunk, as in *season, treason*, &c., so this word, being a compound of our own, and *personage* coming to us from the French, we generally suppress the *o*; but, as *personal, personate*, &c., come to us from the Latin, we generally preserve the *o*. This is the best reason I can give for the slight difference we find in the pronunciation of these words; and, if any one is inclined to think we ought to preserve the *o* distinctly in all of them, except *person*, and even in this, on solemn occasions, I have not the least objection. *W.*

† This word, as may be seen in Johnson, was generally accented by the poets on the first syllable; but the harshness of this pronunciation, arising from the uncombable consonants in the latter syllables, has prevented this pronunciation from gaining any ground in prose; and it were much to be wished that the same reason had prevented the initial accentuation of similar words.— See **IRREFRAGABLE**, **CORRUPTIBLE**, **ACCEPTABLE**, &c. *W.*

✂ I must retract my former pronunciation of the first syllable of this word with Mr. Sheridan and Mr. Perry, and join Dr. Kenrick and Mr. Scott, who make the *e* long. In all words of this form we ought to incline to this pronunciation, from its being so agreeable to analogy. Let it not be pretended that the *e* in the Latin *petalum* is short; so is the *a* in *labellum*, and the *i* in *libellus*, which yet, in the English *label* and *libel*, we pronounce long. But, however right the long sound of *e* may be by analogy, I am apprehensive that, as in *pedals*, the short sound is in more general use. —See **PEDALS**. *W.*

✂ The second manner of pronouncing this word is more general; but the first is more analogical. If, when we pronounce a Latin or Greek word of two syllables, having a single consonant between two vowels, we always make the first vowel long; it is very natural, when such a word is transplanted whole into our own language, to pronounce it in the same manner. That the quantity of the original has very little to do in this case, may be seen under the word *drama*, 544; and yet nothing but an absurd regard to this could have influenced the generality of speakers to pronounce this word

with the first vowel short, contrary to the old, genuine analogy of our own language, as Dr. Wallis calls it, and contrary to the manner in which we pronounce the word in the original; for, though *local, favour, and labour*, have the first vowel short in the Latin *localis, favor, and labor*, we pronounce them, both in Latin and English, according to our own analogy, with the *e* and *a* long and open. The same may be observed of words from the Greek. In the word in question, therefore, the authority of Mr. Sheridan, Mr. Scott, and Dr. Ash, who make the first vowel long, ought to outweigh that of Dr. Kenrick, Mr. Perry, Entick, and Buchanan, who make it short. *W.*

ϕ Professors of every art think they add to its dignity, not only by deriving the terms of it from the Greek, but by pronouncing these terms contrary to the analogy of our own language. For this reason, our pronunciation becomes full of anomalies, and the professors of an art speak one language, and the rest of the world another. Those, therefore, who are not chymists, ought, in my opinion, to enter their protest against the irregular sound of the *g* in this and similar words. Pronouncing the *g* soft would only hurt the pride of the professor; but pronouncing it hard would hurt the genius of the language.—See *HETEROGENEOUS*. *W*.

Mad; inflamed in the brain; frantick. *B. Jenks*.

ϕ This word, (*phrenetic*), as well as *frenitis*, is pronounced by Mr. Sheridan with the accent on the first syllable; in which, though he is contrary to analogy, he is consistent. But Dr. Kenrick and Mr. Barclay pronounce *frenetic* with the accent on the first syllable, and *phrenitis* with the accent on the second. That the penultimate accent is the true pronunciation in both, can scarcely be doubted, if we consult analogy, 509; and that it is most in use, may appear from the additional surrages of Dr. Ash, Mr. Nares, Mr. Scott, Mr. Perry, W. Johnston, Entick, Bailey, and Penning. *W*.

ϕ For the propriety of pronouncing the *s* in these

words like *zh*, we need only appeal to analogy. *S* before a diphthong beginning with *i*, and having the accent before it, either primary or secondary, always goes into *zh*, as may be seen, *Principles*, No. 451. The secondary accent on the first syllable of these words gives a feebleness to the second, which occasions the aspiration of *s* as much as in *evasion*, *adhesion*, &c., where the *s* is preceded by the primary accent. It must, however, be acknowledged, that this is far from being the most general pronunciation.—See ECCLESIASTICK. *W*.

☞ There is a prevailing mispronunciation of this word, by leaving out the *g*, as if the word were French. If this arises from ignorance of the common rules of spelling, it may be observed, that *g* is always pronounced before *n* when it is not in the same syllable; as, *sig-ni-fy*, *in-dig-ni-ty*, &c.; but if affectation be the cause of this error, Dr. Young's *Love of Fame* will be the best cure for it.—See PATHOGNOMONICK. *W*.

♣ The diphthong *ia* in this word does not draw the preceding *t* to *sh*, as in *pitious*, and the reason seems to be the same as that which preserves the same letter pure in *mightier*, *weightier*, &c.; that is, the termination *able*, though derived from the Latin, is often used in composition with pure English words, like the personal and comparative terminations *er*, *eth*, &c.; and, therefore, the general rule in English composition is adhered to, which is, that simples preserve their sound and accent, whatever terminations are annexed to them. *W*.

♣ Mr. Sheridan, Mr. Nares, W. Johnston, and Buchanan, make the radical *a*, in this word and its derivatives, long, as I have done; but Dr. Kenrick and Mr. Perry make it short. Mr. Scott marks it both ways, but seems to give the short sound the preference by placing it first. This, from the shortening power of the antepenultimate accent, it must be confessed, is the most analogical, 335; but this word and its companion, *capable*, seem immovably fixed in the long sound of the antepenultimate, though the *o* in the same situation, in *docible* and *indocible*, evidently inclines to the short sound.—See *INCAPABLE* and *INDOCILE*. *W*.

♣ Mr. Elphinston and some respectable speakers pronounce this word with the first vowel short, as if written plâd-jary; but Mr. Sheridan, Mr. Scott, Mr. Perry, Mr. Buchanan, Dr. Kenrick, W. Johnston, and Entick, mark it with the *a* long, as if written play-jary: and to know which is the true pronunciation, we need only recur to analogy, which tells us, that every vowel, except *i*, having the accent, and being followed by a diphthong, is long.—See *Principles*, No. 505, 507. *W.*

There is a coarse pronunciation of this word, chiefly among the vulgar, which rhymes it with *unt*. ☞ I have preferred those orthoëpists who mark these words as I have done, to Mr. Sheridan, who makes the first syllable like the verb to *ply*. Dr. Kenrick, Mr. Scott, and Perry, the only orthoëpists from whom we can know the sound of the diphthongs *ei*, give it as I have done; and Johnson, by placing the accent after the *e*, seems to have done the same; but the sound we invariably give to these vowels in *plebeian* is a sufficient proof of English analogy; and that pronouncing them like *eye* is an affectation of adhering to the Greek, from which *pleiades* is derived.—See *Key to the Classical Pronunciation of the Greek and Latin Proper Names*, under the word *W*.

☞ Some very respectable speakers make the vowel *e*, in the first syllable of this word, long; but analogy and the best usage seem to shorten the *e*, as they do the *a*

in *granary*. Mr. Nares, W. Johnston, Buchanan, and Entick, adopt the second pronunciation; and Mr. Sheridan, Dr. Kenrick, Dr. Ash, Mr. Scott, and Mr. Perry, the first, nor do I see any reason that the *e* should not be short in this word as well as in *plentitude*, in which all our orthoëpists, except Buchanan, pronounce the *e* as in *plenty*. *W.*

☞ All our orthoëpists, except a Dictionary of Terms in Medicine, place the accent on the first syllable of this word, notwithstanding the Greek and Latin *o* are long. ☞ Though I have agreed with all our orthoëpists in making the first syllable of *perfect* long, I cannot follow them so implicitly in the accent and quantity of this word. All but Mr. Sheridan, W. Johnston, and Mr. Perry, place the accent on the second syllable; and the two first of these writers make the first syllable long, as in *perfect*. Mr. Perry, alone, has, in my opinion, given this word its true pronunciation, by placing the accent on the first syllable, and making that syllable short. This is agreeable to that general tendency of our language to an antepnultimate accentuation, and a short quantity on every vowel but *u*.—See *Principles*, No. 533, 535. *W*.

♣ Mr. Sheridan, Dr. Kenrick, Dr. Ash, Mr. Scott, W. Johnston, and Entick, make the first syllable of this word short, as I have done: and Mr. Perry and Buchanan make it long. In defence of the first pronunciation it may be observed, that this word is not like *primacy* and *primary*; the first of which is a formative of our own; and the second, derived from the Latin *primarius*, which, in our pronunciation of the Latin, does not shorten the *i* in the first syllable as *privativus* does, (see *ACADEMY* and *INCOMPARABLE*;) and therefore these words are no rule for the pronunciation of this; which, besides the general tendency of the penultimate accent to shorten every vowel it falls on but *u*, 535, seems to have another claim to the short vowel from its termination: thus *ônitive, d'native, primitive, derivative, &c.*, all plead for the short sound. *W*.

Mr. Sheridan, Mr. Nares, Dr. Johnson, Dr. Ash, Mr. Scott, W. Johnston, and Mr. Perry, place the accent on the first syllable of this word; and those who give the quantity of the vowels make it short; Buchanan alone, though he places the accent on the first syllable, makes it long.

Mr. Nares suspects the accentuation of this word on the second syllable to be the most ancient, though Shakespeare so frequently places the accent on the first:

"Tell her the *process* of Antonio's end."

Merchant of Venice.

"In brief, to set the needless *process* by."

Measure for Measure.

"In *process* of the seasons I have seen."

Shakespeare's Sonnets.

But Milton accents the second syllable:

"Cannot without *process* of speech be told."

Par. Lost, VII. 178.

"_____ which might rise

"By policy and long *process* of time."—*Ib. II. 297.*

There is a phrase, as Mr. Nares observes, In *process* of time, when we oftener hear the accent on the second syllable of this word than the first. This is undoubtedly a proof of the justness of his observation respecting the antiquity of this pronunciation; but, as it is now antiquated in other phrases, it ought not to be used in this. *W.*

In compliance with so many authorities, I placed the accent on the antepenultimate syllable of *interlocutor*, and nearly the same authorities oblige me to place the accent on the penultimate of this word, for so Dr Johnson, Dr Kenrick, Dr Ash, W. Johnston, Mr. Perry, Buchanan, Barclay, Fenning, and Bailey, accent it. But surely these two words ought not to be differently accented; and, if my opinion had any weight, I would accent them both on the penultimate, as they may be considered exactly like words ending in *ator*, and ought to be accented in the same manner. Mr. Sheridan and Mr. Scott are very singular in placing the accent on the first syllable. — See INTERLOCUTOR. *W.*

\S There are few words more frequently mispronounced than this. A mere English scholar, who considers the verb to *pronounce* as the root of it, cannot easily conceive why the *o* is thrown out of the second syllable; and therefore, to correct the mistake, sounds the word as if written *pronunciation*. Those who are sufficiently learned to escape this error, by understanding that the word comes to us either from the Latin *pronunciatio*, or the French *prononciation*, are very apt to fall into another, by sinking the first aspiration, and pronouncing the third syllable like the noun *she*. But these speakers ought to take notice, that throughout the whole language, *c*, *s*, and *t*, preceded by the accent, either primary or secondary, and followed by *ea*, *ia*, *ie*, or any similar diphthong, always become aspirated, and are pronounced as if written *she*. Thus the very same reasons that oblige us to pronounce *partiality*, *propitiation*, *speciality*, &c., as if written *persheality*, *propish-eashun*, *speshheality*, &c., oblige us to pronounce *pronunciation* as if written *prônunshenshun*.—See *Principles*, No. 357, 450, 461, and the word *ECCELESIASTIC*.

But, though Mr. Sheridan avoids the vulgar error of sinking the aspiration, in my opinion he falls into one fully as exceptionable; which is, that of pronouncing the word in four syllables, as if written *prôn-un-sha-shun*. I am grossly mistaken if correct speakers do not always pronounce this and similar words in the manner I have marked them: and, indeed, Mr. Sheridan himself seems dubious with respect to some of them; for, though he pronounces *glaciate*, *glaciation*, *association*, &c., *glashate*, *glashashun*, *as-sha-shun*, &c., yet he spells *conglaciate*, *conglaciation*, and *consociation*,—*con-glasyate*, *con-glasyashun*, *con-so-syashun*.—See *Principles*, No. 542, 543. *W.*

† The first pronunciation of this word is adopted by Mr. Sheridan, Mr. Scott, Dr. Kenrick, Mr. Smith, Mr. Perry, Buchanan, Barclay, Bailey, and Feuning; and the second by Mr. Nares, Dr. Ash, Dr. Johnson, and Entick. As this substantive was derived from the verb, it had formerly the accent of the verb; and that this accent was the most prevailing, appears from the majority of authorities in its favour. But the respectable authorities for the second pronunciation, and the pretence of distinguishing it from the verb, may very probably establish it, to the detriment of the sound of the language, without any advantage to its signification.—See *Bowl.  δ Mr. Elphinston, Dr. Kenrick, Mr. Smith, Mr. Perry, and Buchanan, are for the first pronunciation of this word, [also Jones, Fulton and Knight;] and Mr. Sheridan, Mr. Nares, Mr. Scott, W.  δ This word, among many others composed of the diphthong *ow*, is subject to a double pronunciation; the one rhyming with *cowl*, and the other with *stroll*. That the former is more agreeable to analogy, may be seen from the more numerous instances of this sound of the *ow* than of the other; that the latter pronunciation, however, was very prevalent, may be gathered from the mode of spelling this word in Phillips' Pastorals, edit. 1748; Tonson and Draper:
 "I only, with the *proling* wolf, constrain'd
 "All night to wake: with hunger he is pain'd,
 "And I with love. His hunger he may tame;
 "But who can quench, O cruel Love! thy flame?"
 The authorities for the first pronunciation are, Mr. Sheridan, Mr. Smith, Mr. Scott, Buchanan, and W. Johnston, [also Jones, Fulton and Knight;] and for the second, Dr. Kenrick, Mr. Nares, and Mr. Perry: and analogy must decide as in the foregoing words.—See *Principles*, No. 325. *W*.

§ The best way to judge of the pronunciation of this and the following word will be to show the authorities for each; and, as the negative of these words, *impuisse*, is governed by its positive, it may not be improper to join it to the list.

Puisse, { Dr. Johnson, Dr. Kenrick, Dr. Ash,
Mr. Scott, W. Johnston, Perry, Fen-
ning, Barclay, Bailey, Buchanan,
and Entick.

Puisse, { Mr. Sheridan. [Jones, Fulton and
Knight.]

Puisant, { Dr. Johnson, Dr. Kenrick, Dr. Ash,
Mr. Scott, Mr. Perry, Buchanan,
W. Johnston, Barclay, Bailey, Fen-
ning, and Entick.

Nothing can be more decisive than the authorities for the penultimate accent on these words; and this induced me to alter my former accentuation on the first syllable; but maturer consideration has convinced me, that this is most conformable to the best as well as the most ancient usage: that double consonants in the middle do not always attract the accent, see *Principles*, No. 503, (b.)

his word, Dr. Johnson says, seems to have been pro-

nounced with only two syllables. "It was undeniably so," says Mr. Mason, "in Shakspeare and subsequent writers;" but if Johnson had taken the pains of looking into Spenser's *Fairy Queen*, he might have found, very near the beginning of the first canto, that the word was a trisyllable:

"And ever as he rode his heart did earne
"To prove his *puissance* in battle brave
"Upon his foe."

I am more and more convinced that the true pronunciation of this word is in three syllables, with the accent on the first. Thus in the first chorus of Shakspeare's *Henry the Fifth*:

"Into a thousand parts divide one man,
"And make imaginary *puissance*."

And again in the third chorus:

"And leave your England as dead midnight still,
"Guarded with grandsires, babies, and old women,
"Or past, or not arriv'd at, pith and *puissance*." *W.*

☞ The common pronunciation of the capital [London] is the first sound given to this word; but in Ireland, and the different counties of England, it is generally pronounced regularly so as to rhyme with *hut*, *put*, &c. W. Johnston has adopted this sound, and Mr. Perry gives it both ways, but seems to prefer the regular sound. Mr. Nares is decidedly in favour of this sound; and, as this word, when a noun, is always so pronounced, it seems a needless departure from rule, and an embarrassment to the language, to have the same word differently pronounced. This is an inconvenience to which, perhaps, all languages are subject; but it ought in all languages to be avoided as much as possible.—See *Bow*.

Mr. Sheridan, Mr. Elphinstone, Mr. Scott, Dr. Kenrick, and Mr. Smith, adopt the first sound. *W.*

See *Walker's Prin.* 414, 415.

It has been observed in the *Principles*, No. 85, 86, &c., that *u*, by articulating the *a*, gives it the deep broad sound, equivalent to the diphthong *au*; and that *u*, preceded by *q*, has exactly the same effect. 414. This is evident from the sound of *a* in this and similar words, which, till lately, was always pronounced broad. Some innovators have attempted to give the *a* in this word its slender sound; but the public ear seems in opposition to it, nor ought it to be admitted. The broad sound is the genuine English pronunciation, as appears in every word where it is succeeded by *r*. As this consonant, when final, or followed by another consonant, gives every *a* that precedes it the Italian sound heard in *father*; so, when these letters are preceded by *qu*, or *w*, the *a* falls into the broad sound heard in *water*. Thus, as we hear *bar*, *dart*, *barrel*, with the sound of the Italian *a*; so we hear *war*, *quart*, and *quarrel*, with the German *a*. *Equator*, *quaver*, and words ending with hard *c*, *g*, and *f*, have departed from this rule; but a sufficient number of words are left to indicate plainly what is the analogy, and to direct us, where usage is doubtful. *W.*

559 Till the orthography of a word is fixed, it will not be easy to settle its pronunciation. That the words *quoif* and *quoit* ought to be written *coif* and *coit*, appears from the derivation of the first from the French *coiffe*, and of the second from the Dutch *coete*; and if this be granted, it will necessarily follow that we ought to pronounce them *coif* and *coit*. 415. *W.*

559 In this and similar words, Mr. Sheridan and several respectable orthoëpists pronounce the *qu* like *k*; but, as Mr. Nares justly observes, it is not easy to say why. If it be answered, that the Latins so pronounced these letters, it may be replied, that when we alter our Latin pronunciation, it will be time enough to alter those English words which are derived from that language. *W.*

559 Mr. Sheridan, Dr. Kenrick, Mr. Scott, W. Johnston, Mr. Nares, Mr. Ferry, and Mr. Smith, pronounce the *o* in this word long, as in *both*; but Buchanan short, as in *moth*. This latter pronunciation is certainly more agreeable to the general sound of *o* before *th*, as in *broth*, *froth*, *cloth*, &c.; but my ear fails me if I have not always heard it pronounced like the *o* in *doth*, as if written *kwôth*, which is the pronunciation Mr. Elphinstone gives it, and, in my opinion, is the true one. *W.*

§ F We must not suppose this word to be the offspring of the English word to *rail*, however nearly they may be sometimes allied in practice. *Raillery* comes directly from the French word *rallierie*; and, in compliment to that language for the assistance it so often affords us, we pronounce the first syllable nearly as in the original. This, however, is not a mere compliment, like the generality of those we pay the French; for, were we to pronounce the first syllable like *rail*, it might obscure and pervert the meaning. Mr. Sheridan, Mr. Scott, Dr. Kenrick, Mr. Nares, W. Johnston, Mr. Perry, and Mr. Smith, pronounce it as I have marked it. *W.*

☞ If antiquity can give a sanction to the pronunciation of a word, this may be traced as far back as the days of Queen Elizabeth. Falstaff, in the first part of Henry the Fourth, being urged by the prince to give reasons for his conduct, toils him, that if raisins were as plenty as blackberries, he would not give him one upon compulsion. This pun evidently shows these words were pronounced exactly alike in Shakespeare's time, and that Mr. Sheridan's pronunciation of this word, as if written ray-s'n, is not only contrary to general usage, but what many would think a greater offence—destructive of the wit of Shakespeare. Mr. Sheridan has Mr. Scott, Mr. Perry, and W. Johnston, on his side; and I have Dr. Kenrick and Mr. Nares on mine. *W.*

¶ The difference in the pronunciation of these words is not only necessary to convey their different signification, but to show their different etymology. The first comes to us from the French *rareté*, and the last from the Latin *raritas*; which, therefore, according to the most settled analogy of our language, ought to have the antepenultimate syllable short.—See *Principles*, No. 511; also the word CHASTITY. *W.*

To RASE ÿ, ràze, or ràse. *v. a.* [*written rase* or *rase*.] [*ras*, Fr.; *rasus*, Lat.] To skim; to strike on the surface. *Shak.* To overthrow; to destroy; to root up. *Milton.* To blot out by rasure; to erase. *Bp. Fisher.*

¶ There seems to be no small difficulty in settling the orthography and pronunciation of this word. Dr. Johnson advises, when it signifies to strike slightly, to write it *rase*; and when it signifies to ruin, *rase*. Whatever may be the utility of this distinction to the eye, the ear seems to have made no such distinction in the sound of the *z*: as *graze*, which is evidently formed from this word, and seems to have been adopted for the purpose of signifying to strike slightly, has preserved the *z*; while *erase*, which means to destroy, to expunge, to take away entirely, is by all our orthoëpists, except Dr. Kenrick, pronounced with the *s* pure. But *rase*, whether signifying to strike slightly, or to overthrow, has been so generally pronounced with the *s* like *z*, that most of our writers have adopted the latter character; and this sound, it may be observed, seems more agreeable to the analogy of verbs in this termination than that in *erase*. 437, 467. But, as nothing seems to be more fixed in the language than the sharp hissing sound of *s* in *crase*, so, if analogy and usage were to compound the difference, perhaps it would be easier to bring *rase* to the sound of *race*, as Mr. Elphinston has done, than *erase* to the sound of *eraze*, as Dr. Kenrick has done: but to sound it with the hissing *s*, when it is written *rase*, as Mr. Sheridan has done, is a solecism in pronunciation; for, though *s* often goes into the sound of *z*, *z* never goes into that of *s*.

The confusion observable among our authors in this word sufficiently shows how inconvenient it is to make the same letters sound differently when a different sense is conveyed. Dr. Johnson seems aware of this when he recommends a different orthography for this word, as it acquires a different meaning; but he does not tell us whether *rase* is to be pronounced like *race* or *raze*; nor do any of our orthoëpists make this distinction of sound according to the sense. With great deference to Dr. Johnson, perhaps such a distinction, both in sound and spelling, is unnecessary and embarrassing. The best way, therefore, in my opinion, will be always to spell this word with the *z* as in *razor*, and to pronounce it with the *z* when it is written *rase*.—See *Bowl. W.*

RATH, ràth. *n. s.* A hill. *Spenser.*

RA'THER, râth'-ûr, or râ'-thûr. ad. [this is a comparative from *rath*; paðor, Sax.] More willingly; with better liking. *Common Prayer.* Preferably to the other; with better reason. *Locke.* In a greater degree than otherwise. *Dryden.* More properly. *Shak.* Especially. *Shak.*—To have rather. To desire in preference. *Rogers.*

Dr. Johnson tells us, that this word is the comparative of *rath*, a Saxon word, signifying *soon*, and that it still retains its original signification; as we may say, "I would sooner do a thing," with as much propriety as, "I would rather do it." Some very respectable speakers pronounce this word with the first syllable like that in *râ-ven*; and Mr. Nares has adopted this pronunciation. Dr. Ash and Bailey seem to be of the same opinion; but all the other orthoëpists, from whom we can certainly know the quantity of the vowel, as Mr. Sheridan, Mr. Elphinston, Mr. Scott, Dr. Kenrick, W. Johnston, Mr. Perry, Buchanan, and Entick, make it short. There is a pronunciation of this, and some few other words, which may not improperly be called diminutive. Thus, in familiar conversation, when we wish to express *very little*, we sometimes lengthen the vowel, and pronounce the word as if written *leetle*. In the same manner, when *rather* signifies just preferable, we lengthen the first vowel, and pronounce it long and slender, as if written *rather*; and this, perhaps, may be the reason that the long slender sound of the vowel has so much obtained; for usage seems to be clearly on the side of the other pronunciation, and analogy requires it, as this word is but the old comparative of the word *rath*, soon. *W.*

almost arbitrarily before verbs and verbal nouns,

sometimes adds little to the simple meaning of the
word, as in *rejoice*.

§ This word is frequently, but corruptly, pronounced as if written *rare*. But though *rear*, rhyming with *fear* is the true pronunciation, we must not suppose it to have the least affinity and signification with *rear*, be hind. Junius and Skinner derive this word from the Saxon word *hrere*, signifying *fluent*, or *trembling*, like the white or yolk of an egg when uncocted; hence Junius explains the phrase a *rear-egg*, a trembling egg; and Skinner imagines that this word may come from the Greek word *ῥέω*, to flow, because uncocted eggs easily flow or move about; or he supposes that our word *rear*, and the Saxon *hrere*, may possibly come from the Latin *rarus*, as opposed to *dense*, because eggs, when boiled, lose their fluidity, and grow thick. This derivation of Skinner seems a little too far-fetched. Whatever may be its origin in the Saxon, it seems to have been used in that language for *crude* and *uncocted*; from the Saxon it comes to us in that sense, and, in my opinion, ought to be written as well as pronounced *rere*. *W*.

☞ The first of these pronunciations is by far the most fashionable, but the second most agreeable to analogy and the ear. So many mutes in the latter syllables require the aid of the antepenultimate accent to pronounce them with ease, and they ought always to have it.—See **ACCEPTABLE** and **CORRUPTIBLE**.

The best way to show what is the general usage in the accentuation of this word, will be to give it as accented by different orthoëpists.

☞ Dr. Johnson and Mr. Sheridan place the accent on the first syllable of this word, and on the second of *deceptory*; but, as these words are both of the same form, till some reason can be given for accenting them differently, I shall consider them both as accented on the first syllable, as that accentuation appears to be not only most agreeable to polite usage, but to the general analogy of words of this termination.—See **PRE/EMPTORY**.

ð Dr. Johnson, Dr. Ash, Dr. Kenrick, Mr. Barclay, Mr. Nares, Mr. Scott, Mr. Fry, and Entick, accent this word on the second syllable; Mr. Sheridan and Bailey [and Mr. Todd] or the last; and Fenning, only, on the first. But, notwit., standing so many authorities are against me, I am much deceived if the analogy of pronunciation be not decidedly in favour of that accentuation which I have given. We have but few instances in the language where we receive a word from the Latin, by dropping a syllable, that we do not remove the accent higher than the original. 503. Thus *recondite*, derived from *reconditus*, may with as much propriety remove the accent from the long penultimate, as *carbuncle* from *carbunculus*, *calumny* from *calumniâ*, *detriment* from *detrimentum*, *innocency* from *innocentia*, *controversy* from *controversia*, and a thousand others. Besides, it may be observed, that Mr. Sheridan and Bailey, by accenting this word on the last syllable, do not decide against the accent on the first; for all words of three syllables which may be accented on the last, may also have an accent on the first, though not inversely. 524. The antepenultimate accent, to which our language has such a tendency, ought, in my opinion, to be indulged in this word, notwithstanding the numerous authorities against it. The word *insondite* must certainly follow the fortunes of the present word; and we find [most of] those orthoëpists, who have the word, accent it as they do *recondite*, Mr. Sheridan on the last syllable, but Mr. Fenning, inconsistently, on the second. *W.*—[recondite, Jones; recondite or recondite, Fulton and Knight.]

RECORD, rêk'-ôrd, or rê-kôrd'. *n. s.* [Fr.] Register; authentic memorial. *Shakspeare.*

ð The noun *record* was anciently, as well as at present, pronounced with the accent either on the first or second syllable: till lately, however, it generally conformed to the analogy of other words of this kind; and we seldom heard the accent on the second syllable till a great luminary of the law, as remarkable for the justness of his elocution as his legal abilities, revived the claim this word anciently had to the ultimate accent; and, since his time, this pronunciation, especially in our courts of justice, seems to have been the most general. We ought, however, to recollect, that this is overturning one of the most settled analogies of our language in the pronunciation of dissyllable nouns and verbs of the same form.—See *Principles*, No. 492.

§† I must in this word retract my former opinion, and give the preference to the accent on the second syllable Mr. Sheridan and W. Johnston might, like myself, suppose usage on their side; but the authority of Drs. Johnson, Ash, Kenrick, Mr. Nares, Perry, Barclay, Penning Bailey, Dyche, and Entick, is sufficient to make us suspect that usage has not so clearly decided; and, therefore, though some words of this form and number of syllables depart from the accentuation of the Latin

words from which they are derived, as *ignorant, laborant, adjutant, permanent, confident*, &c., yet the general rule seems to incline to the preservation of the accent of the original, when the same number of syllables are preserved in the English word—to say nothing of the more immediate formation of this word from the judicial verb to *recuse*.—See *Principles*, No. 437 and 503, (b and k.) *W.*—[*Mr. Todd* has changed the accent with the following remark: "Our word was originally accented on the second syllable, as *Dr. Johnson* gave it, but it is now generally on the first."] *W.*

¶ Almost all the dictionaries I have consulted, except
Mr. Sheridan's, place the accent on the second syllable
of this word; and yet, so prevalent has the latter ac-
centuation been of late years, that Mr. Nares is reduced
to hope it is not fixed beyond recovery. There is, in-
deed, one reason why this word ought not to have the
accent on the first syllable, and that is, the two mutes
in the second and third, which are not so easily pro-
nounced when the accent is removed from them as the
mutes and liquids in *accessory*, *consistory*, *desultory*,
&c.; and, therefore, I am decidedly in favour of the ac-
centuation on the second syllable, which is that adopted
by Dr. Johnson, Dr. Ash, Dr. Kenrick, W. Johnston, Mr.
Nares, Buchanan, Perry, Scott, Bailey, Barclay, and En-
tiek, as all words of this termination have the accent
on the same syllable.—See REFRACTORY, PEREMPTORY

§ Spenser and Milton place the accent upon the second syllable of this word; and, as Mr. Nares observes, Dr. Johnson [altered by Todd] has, on the authority of these authors, adopted this accentuation: "But this," says Mr. Nares, "is irregular; for every monosyllabic termination, added to a word accented on the antepenult, throws the accent to the fourth syllable from the end." With great respect for Mr. Nares's opinion on this subject, I should think a much easier and more general rule might be laid down for all words of this kind, which is, that those words which take the Saxon terminations after them, as *er, less, ness, lessness, ly, &c.*, preserve the accent of the radical word; therefore this and the following word ought to have the same accent as *remedy*, from which they are formed.—See *Principles*, No. 489, 501. *W.*

✂ This word is in such universal use as to be perfectly anglicised; and those who leave out the *s* at the end, in compliment to the French language, show but little taste in their pronunciation of English. To this letter in this word, as well as in several other words, may be applied the judicious advice of Pope:

"In words, as fashions, the same rule will hold;

"Alike fantastick, if too new or old:

"Be not the first by whom the new are try'd,

✂ This word [renitency] and the following were, in Dr. Johnson's third edition, folio, accented on the second syllable; but in the sixth edition, quarto, they have the accent on the first. This latter accentuation, it must be allowed, is more agreeable to English analogy, see *Principles*, No. 503, (b.); but there is an analogy that the learned are very fond of adopting, which is, that when a word from the Latin contains the same number of syllables as the original, the accent of the original should then be preserved; and, as the accent of *renitens* is on the second syllable, the word *renitent* ought to have the accent on the second likewise. For my own part, I approve of our own analogy, both in accent and quantity; but it is the business of a prosodist to give the usage as well as analogy; and, were this word and its formative *renitency* to be brought into common use, I have no doubt but that the Latin analogy, that of accenting this word on the second syllable, would generally prevail. This may fairly be presumed from the suffrages we have for it; namely, Mr. Sheridan, Dr. Kenrick, Dr. Ash, Buchanan, and Entick, who are opposed by no dictionary I have consulted but by Scott's Bailey. *W.*

This word, like several others of the same form, is frequently distorted by an accent on the first syllable. When there are no uncombinable consonants in the latter syllable, this accentuation is not improper; as *despicable*, *disputable*, *preferable*, &c.; but, when consonants of so different an organ as *ct* and *pt* occur in the penultimate and antepenultimate syllables of words without the accent, the difficulty of pronouncing them is a sufficient reason for placing the accent on them in order to assist the pronunciation; and, accordingly, we find almost every word of this form has the accent upon these letters: as *delectable*, *destructible*, *perceptible*, *susceptible*, *discernible*, &c.; besides, as it contributes greatly to place the accent on the most significant part of the word, when other reasons do not forbid, this ought to determine us to lay the stress upon the second syllable of the word in question. This is the accentuation of Mr. Scott, Mr. Buchanan, W. Johnston, Bailey, and Entick; and if Dr. Johnson, Mr. Sheridan, Dr. Ash, Dr. Kenrick, Barclay, Fenning, and Perry, had inserted the word in their dictionaries, they would, in all probability, have accented the word in the same manner. Since the first edition of this dictionary, I see this is the case with the quarto edition of Dr. Johnson.—See *ACCEPTABLE*, *CORRUPTIBLE*, and *IRREFRAGABLE*. *W.*

§ This word was formerly always accented on the second syllable; but the antepenultimate accent, to which our language is so prone in simples of three syllables, has so generally obtained as to make it doubtful to which side the best usage inclines. Dr. Johnson, Sheridan, Ash, Kenrick, Nares, Bailey, and Fenning, accent the second syllable; and Buchanan, W. Johnston, Perry, Barclay, and Entick, the first. Scott accents both, but prefers the first. In this case, then, analogy ought to decide for placing the accent on the first syllable.—See *Principles*, No. 535, and the word *REVENUE*. *W.*

✂ This word seems to have been some years floating between the accent on the first and last syllable, but to have settled at last on the former. It may still, however, be reckoned among those words, which, if occasion require, admit of either. See *Principles*, No. 528. It may, perhaps, be necessary to observe, that some lexicographers have written this word *reverie*, instead of *revery*, and that, while it is thus written, we may place the accent either on the first or last syllable; but, if we place the accent on the last of *revery*, and pronounce the *y* like *e*, there arises an irregularity which forbids it; for *y*, with the accent on it, is never so pronounced. Dr. Johnson's orthography, therefore, with *y* in the last syllable, and Mr. Sheridan's accent on the first, seem to be the most correct mode of writing and pronouncing this word.

A view of the different orthography and accentuation of this word may contribute to confirm that which I have chosen:

of Italy, supposed to have been founded by *Romu-
lus*, and once the mistress of the world.

357 The o in this word seems irrevocably fixed in the
English sound of that letter in *move*, *prove*, &c. *Pope*,
indeed, rhymes it with *dome*:

"Thus when we view some well-proportion'd dome,
"The world's just wonder, and ev'n thine, O Rome? —
But, as Mr. Nares observes, it is most probable that he
pronounced this word as if written *doom*, as he rhymes
Rome with *doom* afterwards in the same poem:

"From the same foes at last both felt their doom;
"And the same age saw learning fall and Rome"

Essay on Criticism, v. 685.

The truth is, nothing certain can be concluded from the rhyming of poets. It may serve to confirm an established usage, but can never direct us where usage is various and uncertain. But the pun which Shakespeare puts into the mouth of Cassius in Julius Cæsar, decidedly shows what was the pronunciation of this word in his time:

"Now it is *Rome*, indeed, and *room* enough,
"When there is in it but one only man."

And the Grammar in Queen Anne's time, recommended by Steele, says, the city *Rome* is pronounced like *room*; and Dr. Jones, in his Spelling Dictionary, 1704, gives it the same sound. *W.*

† This word, with *sacrifice, sacrilege, and sacristy*, is

sometimes pronounced with the *a* in the first syllable long, as in *sacred*; but this is contrary to one of the clearest analogies in the language, which is, that the antepenultimate accent in simples, not followed by a diphthong, always shortens the vowel it falls upon.—See *Principles*, No. 503. Mr. Elphinston, Mr. Sheridan, Mr. Scott, W. Johnston, Kenrick, Perry, and Entick, pronounce these words as I have marked them. *W.*

layed. "Perseus is *sayed* to have been sent by Pallas
 to slay Medusa," &c. page 156. *W.*

✽ The first of these words is generally applied to the

 be the reason for this distinction to the eye, the ear is
 quite insensible of it, and the ship and the man are
 both pronounced alike. See *Principles*, No. 416. *W.*

 be. *W.*

SAL/INE, *sâ-lîne', or sâ-ŷlîne. a.* [*salinus, Lat.*] Consisting of salt; constituting salt. *Brown.*

✂ As this word is derived from the Latin *salinus* by dropping a syllable, the accent ought, according to the general rule of formation, 503, to remove to the first. This accentuation, however, is adopted only by Dr. Johnson, Buchanan, and Bailey; as Sheridan, Kenrick, Ash, Nares, W. Johnson, Scott, Perry, Barclay, Fenning, Entick, and Smith, accent the second syllable. *W.*

SAL/LINOUS, *sâ-lî'-nûs. a.* [*salinus, Lat.*] Consisting of salt; constituting salt.

✂ Dr. Johnson, in his folio dictionary, accents this word on the first syllable, in which he is followed by his publishers in the quarto; but, as this word may be easily derived from the Latin word *salinus*, and with the same number of syllables, it ought to be accented on the second. 503, (c.) *W.*

SAL/IVA, *sâ-lî'-vâ. 503. (b.) n. s.* [*Lat.*] Every thing that is spit up; but it more strictly signifies that juice which is separated by the glands called salival. *Quincy.*

✂ As this word is a perfect Latin word, all our dictionaries very properly accent it on the second syllable, 503. But *salival*, which is a formative of our own, has no such title to the penultimate accent; this pronunciation, however, is adopted by Mr. Sheridan, Dr. Ash, Dr. Kenrick, Scott, Barclay, Fenning, Entick, and Johnson's quarto; but Mr. Perry and Dr. Johnson's folio place the accent on the first syllable, and, in my opinion, more correctly. *W.*

SAL/IVAL, *sâl-ê-vâl, or sâ-lî'-vâl.* [See **SALIVA**.] }

SA'LIVARY, *sâl-ê-vâ-rê. }*

a. Relating to spittle. *Grew.*

SALIVA/TION, *sâl-lê-vâ'-shûn. n. s.* A method of cure much practised of late in venereal, scrofulous, and other obstinate cases, by promoting a secretion of spittle. *Quincy.*

SAL/IVOUS, *sâ-lî'-vûs, or sâl-ê'-vûs. 103.* [*sâ-lî'-vûs, Fulton and Knight.*] *a.* Consisting of spittle; having the nature of spittle. *Wiseman.*

✂ As this word has somewhat more of a Latin aspect

than *salival*, and is probably derived from *salicosus*, the learnedly polite, or the politely learned, snatch at the shadow of Latin quantity to distinguish themselves from mere English speakers. Hence, in all the words of this termination, they preserve the penultimate a long, and place the accent on it; and thus we are obliged to do the same in this word, under pain of appearing illiterate. This penalty, however, Dr. Ash and Mr. Perry have incurred, by placing the accent on the first syllable; but Dr. Johnson, Mr. Sheridan, Mr. Scott, Barclay, Fenning, and Entick, follow the learned majority, though evidently wrong. *W.*

SA'LLET*, *sâl'-lît. n. s.* [*salade, Fr.*] A helmet. *Chaucer.*

Dr. Johnson tells us that this word is originally and properly *salv*; which, having *salves* in the plural, the singular, in time, was borrowed from it: *salv*, Saxon, undoubtedly from *salvus*, Latin. There is some diversity among our orthoëpists about the *l* in this word and its verb. Mr. Sheridan marks it to be pronounced; Mr. Smith, W. Johnston, and Barclay, make it mute; Mr. Scott and Mr. Perry give it both ways; and Mr. Nares says it is mute in the noun, but sounded in the

verb. The mute *l* is certainly countenanced in this word by *calve* and *halve*; but as they are very irregular, and are the only words where the *l* is silent in this situation, (for *valve*, *delve*, *solve*, &c., have the *l* pronounced,) and as this word is of Latin original, the *l* ought certainly to be preserved in both words: for, to have the same word sounded differently, to signify different things, is a defect in language that ought, as possible, to be avoided.—See *BOWL* and *FAULT*. *W.*

Mr. Nares, Buchanan, and W. Johnston, pronounce the *a* in the first syllable of this word long; but Mr. Sheridan, Mr. Scott, and Entick, more properly, short. Buchanan, only, makes the same *a* in *sanative* long; but Mr. Sheridan, Scott, W. Johnston, Perry, and Entick, short. Mr. Sheridan and Buchanan are the only orthoëpists from whom we can gather the sound of this vowel in *insanable*, which the latter marks long, and the former short, as it ought to be, from the shortening power of the antepenultimate accent.—See *GRANARY*. *W.*

SA/TAN*, sà'-tàn, or sàt'-tàn. *n. s.* [Heb.] The devil. *Rev. xii.*
 ⚡ This word is frequently pronounced as if written *Sattan*; but making the first syllable long is so agreeable to analogy, that it ought to be indulged wherever custom will permit, and particularly in proper names. *Cato*, *Plato*, &c. have now universally the penultimate *a* long and slender; and no good reason can be given why the word in question should not join this class: if the short quantity of the *a* in the original be alleged, for an answer to this see *Principles*, No. 544, and the word *SATIRE*. Mr. Nares and Buchanan, only, adopt the second sound; but Mr. Elphinston, Mr. Sheridan, Dr. Kenrick, Mr. Scott, W. Johnston, Mr. Perry, Entick, and, if we may judge by the position of the accent, Dr. Ash and Bailey, the first.—See *The Key to the Classical Pronunciation of Greek, Latin, and Scripture Proper Names*, under the word. *W.*

SA'TELLITE §, sâ't-èl-lîte. [sâ't-èl-lîte. *Sheridan, Jones, Perry, Fulton and Knight; sâ't-èl-lît, Kenrick.*] *n. s.* [satelles, Lat.; satellite, Fr.] A small planet revolving round a larger. *Locke*.

§ Pope has, by the license of his art, accented the plural of this word upon the second syllable, and, like the Latin plural, has given it four syllables:

"Or ask of yonder argent fields above,
"Why Jove's satellites are less than Jove."

Essay on Man.

This, however, is only pardonable in poetry, and, it may be added, in good poetry.—See ANTIPODES and MILLIPEDES. *W.*

SATELLITIOUS, sât-tèl-lîsh'-ûs. *a.* Consisting of satellites. *Cheyne*.

SA'TIATE, sâ't-shè-âte. *a.* Glutted; full of satiety. *Pope*.

SATIA'TION*, sâ-shè-â'-shûn. *n. s.* The state of being filled. *Whitaker*.

SA'TIETY, sâ-tî-è-tè. 460. *n. s.* [satiety, Lat.; satieté, Fr.] Fulness beyond desire or pleasure; more than enough; wearisomeness of plenty; state of being palled or glutted. *Shakspeare*.

§ The sound of the second syllable of this word has been grossly mistaken by the generality of speakers; nor is it much to be wondered at. *Ti*, with the accent on it, succeeded by a vowel, is a very uncommon predicament for an English syllable to be under; and therefore it is not surprising that it has been almost universally confounded with an apparently similar, but really different, assemblage of accent, vowels, and consonants. So accustomed is the ear to the aspirated sound of *t*, when followed by two vowels, that, whenever these appear, we are apt to annex the very same sound to that letter, without attending to an essential circumstance in this word, which distinguishes it from every other in the language. There is no English word of exactly the same form with *satiety*, and therefore it cannot, like most other words, be tried by its peers; but analogy, that grand resource of reason, will as clearly determine, in this case, as if the most positive evidence were produced.

In the first place, then, the sound commonly given to the second syllable of this word, which is that of the first of *si-lence*, as if written *sa-si-e-ty*, is never found annexed to the same letters throughout the whole language. *Ti*, when succeeded by two vowels, in every instance but the word in question, sounds exactly like *sh*; thus *sati-ate*, *expi-ate*, &c., are pronounced as if written *sa-she-ate*, *ex-pa-she-ate*, &c., and not *sa-se-ate*, *ex-pa-se-ate*, &c.; and, therefore, if the *t* must be aspirated in this word, it ought at least to assume that aspiration which is found among similar assemblages of letters, and, instead of *sa-si-e-ty*, it ought to be sounded *sa-shi-e-ty*: in this mode of pronunciation a greater parity might be pleaded; nor should we introduce a new aspiration to reproach our language with needless irregularity. But, if we once cast an eye on those conditions on which we give an aspirated sound to the dentals, 26, we shall find both these methods of pronouncing this word equally remote from analogy. In almost every termination where the consonants *t*, *d*, *c*, and *s*, precede the vowels *ea*, *ia*, *ie*, *io*, &c., as in *martial*, *soldier*, *suspicion*, *confusion*, *anxious*, *prescience*, &c., the accent is on the syllable immediately before these consonants, and they all assume the aspiration; but in *Ægyptiacum*, *elephantiasis*, *hendiadis*, *society*, *anxiety*, *science*, &c., the accent is immediately after these consonants, and the *t*, *d*, *c*, and *s*, are pronounced as free from aspiration as the same letters in *tiar*, *dict*, *cion*, *Irion*, &c.: the position of the accent makes the whole difference. But, if analogy in our own language were silent, the uniform pronunciation of words from the learned languages, where these letters occur, would be sufficient to decide the dispute. Thus in *elephantiasis*, *Miltiades*, *satiety*, &c., the antepenultimate syllable *ti* is always pronounced like the English noun *tie*; nor should we dream of giving *ti* the aspirated sound in these words, though there would be exactly the same reason

for it as in *satiety*; for, except in very few instances, as we pronounce Latin in the analogy of our own language, no reason can be given why we should pronounce the antepenultimate syllable in *satiety*, one way, and that in *satiety* another.

I should have thought my time thrown away in so minute an investigation of the pronunciation of this word, if I had not found the best judges disagree about it. That Mr. Sheridan supposed it ought to be pronounced *sa-si-e-ty* is evident from his giving this word as an instance of the various sounds of *t*, and telling us that here it sounds *s*. Mr. Garrick, whom I consulted on this word, told me, if there were any rules for pronunciation, I was certainly right in mine; but that he and his literary acquaintance pronounced in the other manner. Dr. Johnson likewise thought I was right, but that the greater number of speakers were against me; and Dr. Lowth told me he was clearly of my opinion, but that he could get nobody to follow him. I was much flattered to find my sentiments confirmed by so great a judge, and much more flattered when I found my reasons were entirely new to him.

But, notwithstanding the tide of opinion was some years ago so much against me, I have since had the pleasure of finding some of the most judicious philologists on my side. Mr. Elphinstone, Dr. Kenrick, and Mr. Perry, mark the word as I have done, [also Jones, Fulton and Knight]; and Mr. Nares is of opinion it ought to be so pronounced, though, for a reason very different from those I have produced, namely, in order to keep it as distinct as may be from the word *society*; while Mr. Fry frankly owns it is very difficult to determine the proper pronunciation of this word.

Thus I have ventured to decide where "doctors disagree," and have been induced to spend so much time on the correction of this word, as the improper pronunciation of it does not, as in most other cases, proceed from an evident caprice of custom, as in *busy* and *bury*, or from a desire of drawing nearer to the original language, but from an absolute mistake of the principles on which we pronounce our own. *W.*

SA'TIN, sâ't-ûn. *n. s.* [Fr.; *satin*, Dutch.] A soft, close, and shining silk. *Sidney*.

SA'TINET*, sâ't-è-nèt. *n. s.* A sort of slight satin.

SA'TIRE §, sâ't-ûr, sâ't-ûr, sâ't-tre, or sâ't-lre. [sâ't-ûr, *Perry, Jones, Fulton and Knight.*] *n. s.* [satyra, Lat.] A poem in which wickedness or folly is censured. Proper *satire* is distinguished, by the generality of the reflections, from a lampoon, which is aimed against a particular person; but they are too frequently confounded. *Bp. Hall*.

§ The first mode of pronouncing this word is adopted by Mr. Sheridan, Mr. Scott, Dr. Ash, and Mr. Smith. The short quantity of the first vowel is adopted by Mr. Nares, Mr. Elphinstone, Buchanan, and Entick; but the quantity of the second syllable they have not marked. The third is adopted by Dr. Kenrick; and for the fourth we have no authorities.

But, though the first mode of pronouncing this word is the most general, and the most agreeable to an English ear, the second seems to be that which is most favoured by the learned, because, say they, the first syllable in the Latin *satyra* is short. But, if this reasoning were to hold good, we ought to pronounce the first syllable of *silence*, *local*, *label*, *libel*, *locust*, *paper*, and many others, should be accented; *silentium*, *localis*, *labellum*, *libellus*, *locusta*, *papyrus*, &c., have all the first syllable short in Latin. But, to furnish the learned with an argument which perhaps may not immediately occur to them, it may be said, that, in the instances I have adduced, none of the Latin words have the initial syllable accented as well as short, which is the case with the word *satyra*; but it may be answered, if we were to follow the quantity of the Latin accented vowel, we must pronounce *field*, *mimick*, *frigid*, *squalid*, *comick*, *resin*, *credit*, *spirit*, and *lily*, with the first vowel long, because it is the case in the Latin words *fetidus*, *mimicus*, *frigidus*, *squalidus*, *comicus*, *resina*, *creditus*, *spiritus*, and *lilium*.

The only shadow of an argument, therefore, that remains is, that, though we do not adopt the Latin quantity of the accented antepenultimate vowel when it is long, we do when it is short. For, though we have many instances where an English word of two syllables has the first short, though derived from a Latin word where the two first syllables are long; as, *civil*, *legate*, *solemn*, &c., from *civilis*, *legatus*, *solemnis*, &c.; yet we have no instance in the language where a word of three syllables in Latin, with the two first vowels short, becomes an English dissyllable with the first syllable long, except the vowel be *u*.—See *Principles*. No. 507, 508, 509

—nò, mòve, nòr, nòt;—tùbe, túb, búll;—òil;—pòlnd;—thín, THIS.

Hence the shortness of the first syllables of *platane*, *zephyr*, *atom*, &c., from *platanus*, *zephyrus*, *atomus*, &c., which are short, not only from the custom of carrying the short sound we give to the Latin antepenultimate vowel into the penultimate of the English word derived from it, but from the affectation of shortening the initial vowel, which this custom has introduced, in order to give our pronunciation a Latin air, and furnish us with an opportunity of showing our learning by appealing to Latin quantity; which, when applied to English, is so vague and uncertain as to put us out of all fear of detection if we happen to be wrong. The absurd custom, therefore, of shortening our vowels, ought to be discountenanced as much as possible, since it is supported by such weak and desultory arguments; and our own analogy, in this as well as in similar words, ought to be preferred to such a shadow of analogy to the quantity of the Latin language as I have charitably afforded to those who are ignorant of it.—See *Principles*, No. 544.

Though poets often bend the rhyme to their verse, when they cannot bring their verse to the rhyme; yet, where custom is equivocal, they certainly are of some weight. In this view we may look upon Pope's couplet in his *Essay on Criticism*:

"Leave dangerous truths to unsuccessful satires,
"And flattery to fulsome dedicators."

With respect to the quantity of the last syllable, though custom seems to have decided it in this word, it is not so certain in other words of a similar form. These we purpose to consider under the word *Urraze*, which see.

Lead.

☞ This was supposed to be the remotest planet when
Dr. Johnson wrote his dictionary; but Mr. Herschel has
since discovered a planet still more remote, which will
undoubtedly be called hereafter by his own name. The
first pronunciation of this word is not the most general,
but by far the most analogical; and for the same reason
as in *Satan*: but there is an additional reason in this
word, which will weigh greatly with the learned, and
that is, the *a* is long in the original. Mr. Elphinston,
Dr. Kenrick, Perry, and Entick, adopt the second pro-
nunciation of this word; and Mr. Sheridan, Scott, Bu-
chanan, W. Johnston, and, if we may guess by the po-
sition of the accent, Dr. Ash and Bailey, the first. *W*.

To SAUCE, sâwse. *v. n.* To accompany meat with
something of higher relish. To gratify with rich

SAUL*, sâw'l. *n. s.* [Paul, Sax.] The soul: so pronounced in some parts of the north of England, and so anciently written. [See SOUL.]

☞ The first mode of pronouncing this word is the most agreeable to analogy, if not in the most general use; but, where use has formed so clear a rule as in words of this form, it is wrong not to follow it.—See *Principles*, No. 214. Mr. Elphinston, Dr. Kenrick, Mr. Nares, and Mr. Scott, are for the first pronunciation; and Mr. Sheridan and W. Johnston for the last. Mr. Perry gives both; but, by placing them as I have done, seems to give the preference to the first. *W.*

☞ This word is pronounced in the first manner by correct, and in the second by vulgar speakers. Among this number, however, I do not reckon Mr. Sheridan, Mr. Smith, and Mr. Scott, who adopt it; but, in my opinion, Dr. Kenrick and Mr. Perry, who prefer the first, are not only more agreeable to rule, but to the best usage. In this opinion I am confirmed by Mr. Nares, who says it is commonly pronounced in the second manner.—See *Principles*, No. 213. *W.*

SCENICK, sèn'-nìk. } *nique, Fr.] Dramatick; theatrical. B. Jonson.*

From the general tendency of the antepenultimate accent to shorten the vowel, and the particular propensity to contract every vowel but *u* before the termination in *ical*, we find those in *ick*, which may be looked upon as abbreviations of the other, preserve the same shortening power with respect to the vowels which precede: and, though the word in question might plead the long sound of the *e* in the Latin *scenicus*, yet, if this plea were admitted, we ought, for the same reasons, to alter the sound of *o* in *comick*; nor should we know where to stop. As a plain analogy, therefore, is formed by *epick*, *topick*, *tropick*, *tonick*, &c., it would be absurd to break in upon it, under pretence of conforming to Latin quantity; as this would disturb our most settled usages, and quite unhinge the language.—See *Principles*, No. 544. *W.*

SCHEDIASM†, skè'-dè-ázim. *n. s.* [σχέδιασμα.]

Cursory writing on a loose sheet.

From this word is not in Johnson, but, from its utility, is certainly worthy of a niche in all our other dictionaries as well as Ash's, where it is to be found. The Latins have their *schediasma*, the French have their *feuille volante*, and why should not the English have their *schediasm*, to express what is written in an extemporary way on a loose sheet of paper, without the formality of composition? *W.*

SCHEDULE, sèd'-jùle, or skèd'-jùle. [sèd'-ùle. *Jones, Fulton and Knight.* *n. s.* [schedula, Lat.; schedule, Fr.] A small scroll. *Hooker.* A writing additional or appendant. *Donne.* A little inventory. *Shakspeare.*

From the pronunciation of this word we seem to depart both from the Latin *schedula* and the French *schedule*. If we follow the first, we ought to pronounce the word *skedule*, 353; if the last, *shédule*; but entirely sinking the *ch* in *schedule* seems to be the prevailing mode, and too firmly fixed by custom to be altered in favour of either of its original words. Dr. Kenrick, Mr. Perry, and Buchanan, pronounce it *skedule*; but Mr. Elphinston, Mr. Sheridan, Mr. Scott, Mr. Nares, Barclay, Fenning, and Shaw, *sedule*: though, if we may believe Dr. Jones, it was pronounced *skedule* in Queen Anne's time. *W.*

SCHISM, schîz. *n. s.* [schisme, Fr.; σχίσμα, Gr.]
A separation or division in the church of God.
King Charles.

✠ The common pronunciation of this word is con-
trary to every rule for pronouncing words from the learn-
ed languages, and ought to be altered. *Ch* in English
words, coming from Greek words with *χ*, ought always
to be pronounced like *k*; and I believe the word in
question is almost the only exception throughout the
language. However strange, therefore, *schîz* may
sound, it is the only true and analogical pronunciation;
and we might as well pronounce *scheme* *seme*, as *schism*
sizm, there being exactly the same reason for both.
But, when once a false pronunciation is fixed, as this is,
it requires some daring spirit to begin the reformation;
but, when once begun, as it has, what seldom happens,
truth, novelty, and the appearance of Greek erudition
on its side, there is no doubt of its success. Whatever,
therefore, may be the fate of its pronunciation, it ought
still to retain its spelling. This must be held sacred,
or the whole language will be metamorphosed: for the
very same reason that induced Dr. Johnson to spell
sceptick *skeptick*, ought to have made him spell *schism*
sizm, and *schedule* *sedule*. All our orthoëpists pro-
nounce the word as I have marked it. *W.*

SCIRRHUS, skîr-rús. 109. *n. s.* [schirre, Fr.; σκίρρως, Gr.] An indurated gland. *Wiseman.*

This word is sometimes, but improperly, written *schirrus*, with the *h* in the first syllable instead of the last; and Bailey and Fenning have given us two aspirations, and spelt it *schirrus*; both of which modes of spelling the word are contrary to the general analogy of orthography; for, as the word comes from the Greek σκίρρως, the latter *r* only can have the aspiration, as the first of these double letters has always the spiritus lenis; and the *c*, in the first syllable, arising from the Greek *κ*, and not the *χ*, no more reason can be given for placing the *h* after it, by spelling it *schirrus*, than there is for spelling *scene*, from σκηνή, *scene*; or *sceptre*, from σκῆπτρον, *sceptre*. The most correct Latin orthography confirms this opinion, by spelling the word in question *scirrhus*; and, according to the most settled analogy of our own language, and the constant method of pronouncing words from the Greek and Latin, the *c* ought to be soft before the *i* in this word, and the first syllable should be pronounced like the first of *syr-inge*, *Sir-i-us*, &c.

Whatever might have been the occasion of the false orthography of this word, its false pronunciation seems fixed beyond recovery: and Dr. Johnson tells us it ought to be written *schirrus*, not merely because it comes from σκίρρως, but because *c* in English has before *e* and *i* the sound of *s*. Dr. Johnson is the last man that I should have suspected of giving this advice. What! because a false orthography has obtained, and a false pronunciation in consequence of it, must both these errors be confirmed by a still grosser departure from analogy? A little reflection on the consequences of so pernicious a practice would, I doubt not, have made Dr. Johnson retract his advice. While a true orthography remains, there is some hope that a false pro-

nunciation may be reclaimed; but, when once the orthography is altered, pronunciation is incorrigible; and we must bow to the tyrant, however false may be his title.—See *Principles*, No. 350.

Mr. Sheridan pronounces this word *skirrous*; Mr. Scott, Mr. Perry, and W. Johnston, have omitted it; neither Dr. Kenrick nor Buchanan takes any notice of the sound of *c*, and, according to them, it might be pronounced *s*, but Barclay writes it to be pronounced *skirrus*. *W.*
